75. Operators of cranes, various lifting equipment and similar equipment C8343	252
76. Conclusion	256

0. EXECUTIVE SUMMARY

This report analyzes the status of 17 construction occupations covered by ESCO (European Skills, Competences, Qualifications and Occupations), which is the multilingual European classification of skills, competences, qualifications and occupations.

ESCO functions as a dictionary, which describes, identifies and classifies professional occupations, competences and qualifications relevant to the EU labor market, education and training.

The information extracted for each occupation responds to the computer analysis that the DETECTA tool, developed in WP4 of the project, carried out during the month of December 2020. This tool has a dynamic character and at each moment it describes the situation of the occupations of the sector from different points of view:

- Existing job offers related to each occupation considered.
- Examples of job offers, including their location and description.
- Training offer that qualifies for the occupation in question.

From the above perspective, the report presents and analyzes the information corresponding to the period indicated above. The great advantage of the DETECTA tool is that it allows the preparation of reports similar to this one, in real time, at any desired moment.

At the end of the analysis by occupation, conclusions are drawn for each of the countries considered: Spain, Belgium, Ireland and France.

1. INTRODUCTION

According to Álvarez (2010), the position or OCCUPATION is the set of work tasks determined by the development of the technique, technology, and the division of labor. It includes the work function of the worker and the limits of their competence. position for technicians and leaders.

Within the terminology used, the terms work, tasks, positions, positions are generally used. The use of one or the other term is linked to conceptions about the nature and structure of work. The term position is one of the most traditionally used, but it gives the idea of essentially referring to the physical place where the work takes place and gives an idea of immobility, although many authors define it with the same meaning as the term position.

The definition of Occupation, as "Set of jobs whose tasks are very similar. Corresponds to the Primary Group " constitutes the first step of grouping work activities.

"Basic unit of analysis and organization of work activity, understood as an aggregate of competences with value and meaning in employment, with a socially recognized substrate of professionalism and an effective reference in the dynamics of the daily encounter between the supply and demand of work"

And also, as "a pattern that ideally gathers all those competencies present in the reality of the productive world".

What is understood by NEED FOR TRAINING? It is not easy to arrive at a single definition that encompasses all training possibilities.

Is the demand made by a person in their job to expand the field of knowledge in a subject a need for training? Are training needs those that arise because of an organizational or legislative change, which requires modifying the tasks or functions of a job? What "need" must be satisfied?

At present, the detection of training needs is aimed at covering deficiencies **ALIGNED WITH THE LABOR MARKET**.

In addition, training needs must incorporate evaluation into their own definition, must be in a continuous process of review and update, and provide indicators that allow measuring their efficiency, effectiveness, and profitability. Hence, a dynamic tool like DETECTA takes on vital importance, given its dynamic nature.

In the previous line, the occupation is presented as a set of skills that a worker must know how to perform and for which the existing training must train.

In Europe, a very important reference is **ESCO (European Skills, Competences, Qualifications and Occupations)** is the European multilingual classification of skills, competences, qualifications, and occupations.

ESCO works like a dictionary, describing, identifying, and classifying professional occupations, skills and qualifications relevant to the EU labor market, education and training.

These concepts and the relationships between them can be understood by electronic systems in a way that allows different online platforms to use ESCO for different services such as: matching job applicants with jobs based on their skills, suggesting training to those who wish to improve their skills .

In the construction sector we have the following four-digit occupations, which are the ones that we are going to analyze in this report.

- 7111 Home builders
- 7112 Masons and related workers
- 7114 Concrete setters, concrete finishers, and the like
- 7115 Carpenters and cabinetmakers
- 7119 Construction and allied trades workers, not elsewhere classified
- 7121 Roofers
- 7122 Floor and tile fixers
- 7123 Plasterers
- 7124 Insulators
- 7125 Glaziers
- 7126 Plumbers and pipe fitters
- 7127 Air conditioning and refrigeration mechanics
- 7131 Painters and related
- 7132 Painters and varnishers
- 7133 Building structure cleaners
- 8342 Earthmoving and related plant operators
- 8343 Crane, hoist, and related facility operators

The structure of analysis of the occupations of the sector responds to the results that can be extracted from the tool, based on Big Data and Artificial Intelligence developed in WP4, that is, the following:

NAME OF THE OCCUPANCY GROUP (ESCO) to 4 digits

Job offers

- Number of current job offers.
- Percentages of job offers related to occupation with respect to the total of the sector
- Examples of localized job offers. The tool for an occupation can locate dozens of offers or in certain cases none. In this report we will reflect, where they exist, as an example a maximum of five.

Name of each occupation that make up the group.

ID

- Coded
- Description.
- Skills (or competencies).

Training analysis

- Training courses. The tool for an occupation can locate a current course or in certain cases none. When locating courses, in this report we will reflect as an example a maximum of five. Using the tool, the specific centers where each course is being offered can be consulted.

Consider that the results exploitation date was December 2020. It is therefore a question of reflecting the reality of the sector on that date, and job offers (EURES) or training courses (FUNDAE, DORIFOR, FETCHCOURSES, INTERCARIFOREF). The tool has been designed precisely so that periodic consultations can be always made and observe the reality of the sector.

Next, we will analyze for each country the occupational and training situation of the construction sector.

2. SPANISH CASE

3. HOME BUILDERS C7111

JOB OFFERS

- There are no current job offers

3.1 REAL ESTATE BUILDER / REAL ESTATE BUILDER

ID

- **ESCO code:** C7111
- **Description:** Real estate builders construct, maintain, and repair homes or similar small buildings using a range of techniques and materials from various construction workers.
- **Abilities:**
 1. Check the conformity of the construction with respect to current regulations
 2. Roof construction techniques
 3. Check material compatibility
 4. Browse concrete structures
 5. Design floors
 6. Work as a team in construction crews
 7. Prepare Surfaces for Hardwood Flooring
 8. Building regulations
 9. Draw Floor Plan
 10. Building materials industry
 11. Follow safety procedures when working at height
 12. Smooth wooden surface
 13. Use safety equipment on construction sites
 14. Planning house construction works
 15. Inspect roofs
 16. Read standard drawings
 17. Follow health and safety procedures in construction
 18. Waterproofing floors
 19. Prepare terraces for building

RACE OFFER ANALYSIS

1. Prl for construction managers and execution technicians in construction companies
 - **General objectives:** Acquire the necessary knowledge, both theoretical and practical, for the application of safe work techniques during the execution of work units carried out by construction managers and execution technicians of construction companies.
 - **Modules**
 1. Prl for construction managers and execution technicians in construction companies

4. BRICKLAYERS C7112

JOB OFFERS

- Number of current job offers related to occupation: 1,469
- Percentage of offers related to occupation with respect to the total of the sector: 0.94%
 1. MASONRY FOR THE PROVINCE OF ALMERIA
 - **Description:** Company dedicated to civil works located in the Almanzora Valley (Almería) requests 2 positions from ALBAÑIL for construction in general to carry out works in the Almanzora Valley region and Almería province. Their tasks include those of the occupation such as placing stones, solid or hollow bricks and other similar construction elements to build or repair walls, partitions, chimneys, construction of sidewalks, curbs and stone walkways and other works. It is necessary to accredit at least 24 months of experience, as well as have completed the 20-HOUR PRL course. A 12-month full-time employment contract is offered with a salary of 1647?? gross / month ..
 - **ESCO code:** C7112
 - **Zoned:** Almeria
 - **Postal Code:** 12345
 2. Of. 3rd Mant. MAR21-027 Prefabricated Modules
 - **Description:** Company located in Castellbisbal, dedicated to the sale and rental of prefabricated modules in more than 15 countries, it needs to incorporate; - Of. 3rd Maintenance Prefabricated Modules - You must carry out assembly and maintenance tasks on the prefabricated modules - Demonstrable experience in the position - Knowledge in painting, masonry, electricity, plumbing, etc. - Preferably residing in the Sant Andreu area and / or surroundings - They will work in the field and in a workshop - Temporary contract + incorporation into the company - Hours: Monday to Friday from 8 am to 2 pm and 3 pm to 5 pm - Gross hourly salary € 10.48 - Immediate incorporation Company located in Castellbisbal, dedicated to the sale and rental of prefabricated modules in more than 15 countries, needs to incorporate; - Of.
 - **ESCO code:** C7112
 - **Zoned:** Barcelona
 - **Postal Code:** 12345
 3. ENCARREGAT D'EQUIP / OFFICIAL FIRST PALLET
 - **Description:** Management and Consulting Personnel Selection -Supervise l'execució de l'obra (habitatges). Equipped with fins to 15 professionals. - Supervise the work of different offices: industrials (plumbers, tubers, fusters, etc.), pallets of company equipment, control of eines, etc. -Realitza pròpies tasks of supervision and coordination. This includes sporadically the realization of the paleta treball, marcatge, etc. -Review and finalize some details and final auctions, perform some canvises in the work that the client agreed (send a shipment, etc.) ..
 - **ESCO code:** C7112
 - **Zoned:** Lleida

- **Postal Code:** 12345
- 4. BUILDING MAINTAINERS
 - **Description:** OFFER FOR TWO TECHNICAL SERVICE ASSISTANTS IN ADEJE HOTEL, PREFERABLY IN THE SOUTH ZONE. THEY MUST HAVE RELATED TRAINING / TRAINING CYCLE, MINIMUM 12 MONTH EXPERIENCE, FULL DAY, GROSS ANNUAL SALARY: 18,092 EUROS Contact details: OFFER CODE: 052021001176 www.gobiernodecanarias.org/empleo.
 - **ESCO code:** C7112
 - **Zoned:** ES702 (NUTS code)
 - **Postal Code:** 12345
- 5. MASONS
 - **Description:** ALBAÑIL, OFICIAL 1ª, FOR WORKS IN THE PLAINS OF ARIDANE AND SURROUNDINGS. IT IS VALUED TO HAVE THE SPECIFIC PRL OF THE JOB. FULL DAY, TIMETABLE FROM 7:30 AM to 3:30 PM FROM MONDAY TO FRIDAY Contact details: OFFER CODE: 052021001193 www.gobiernodecanarias.org/empleo.
 - **ESCO code:** C7112
 - **Zoned:** ES702 (NUTS code)
 - **Postal Code:** 12345

4.1 BUILDER

ID

- **ESCO code:** C7112
- **Description:** Masons assembles walls and structures by skillfully laying bricks in an established pattern, using a binding agent, such as cement, to bond the bricks. They then fill the joints with cement or other suitable materials.
- **Abilities:**
 1. Interpreter plans in 2d
 2. Work ergonomically
 3. Browse building materials
 4. Follow safety procedures when working at height
 5. Protect work areas
 6. Finish mortar joints
 7. Chalk lines
 8. Transport building materials
 9. Use measuring instruments
 10. Cut bricks
 11. Follow health and safety procedures in construction
 12. Check that the walls are vertically level
 13. Use safety equipment on construction sites
 14. Separate waste
 15. Interpreter plans in 3d

RACE OFFER ANALYSIS

1. Masonry factories

- **General objectives:** Organize and carry out brick, block and stone masonry factory works (resistant walls, enclosures and partitions), following the guidelines specified in technical documentation and the established safety and quality prescriptions.
- **Modules**
 1. Pastes, mortars, adhesives and concretes
 2. Factory works to cover.
 3. Factory works seen.
 4. Masonry works

4.2 HAND CARVING OF STONES OR MARBLE

ID

- **ESCO code:** C7112
- **Description:** Stone or marble handworkers use hand tools, machines, and chemicals to etch and carve patterns and inscriptions on stone surfaces.
- **Abilities:**
 1. Place engraving equipment
 2. Clean etched areas
 3. Types of tips for sweet carving
 4. Record patterns
 5. Measure materials
 6. Adjust cutting properties
 7. Inspect the stone surface
 8. Types of stones to engrave
 9. Quality standards
 10. Guarantee the availability of equipment
 11. Wash stone
 12. Prepare workpieces for engraving
 13. Operating the engraving equipment
 14. Sketching designs on workpieces

RACE OFFER ANALYSIS

- No current courses have been located

5. WORKERS IN REINFORCED CEMENT, PLASTERS AND RELATED C7114

JOB OFFERS

- Number of current job offers related to occupation: 233
- Percentage of offers related to occupation with respect to the total of the sector: 0.15%
 1. ASSEMBLY -PIPES AND STRUCTURES-
 - **Description:** Work consisting in the assembly of PIPES -Cut, bend, weld etc. for supplies and heating - Also assembly of structures for laying pipes etc. PLACING PIPES (CUTTING-BENDING-WELDING ETC) AND ARRIVING THE CASE ASSEMBLY OF STRUCTURES FOR PLACING PIPES.
 - **ESCO code:** C7114
 - **Zoned:** Barcelona
 - **Postal Code:** 12345
 2. FERRALLISTS
 - **Description:** FERRALLISTA, OFFICIAL 1ª, FOR WORKS IN THE PLAINS OF ARIDANE AND SURROUNDINGS. IT IS VALUED TO HAVE THE SPECIFIC PRL OF THE JOB. FULL DAY, HOURS FROM 7:30 TO 15:30 FROM MONDAY TO FRIDAY Contact details: OFFER CODE: 052021001194 www.gobiernodecanarias.org/empleo.
 - **ESCO code:** C7114
 - **Zoned:** ES702 (NUTS code)
 - **Postal Code:** 12345
 3. ESSENTIAL FORMWORK 5 YEARS EXPERIENCE
 - **Description:** 2 POSITIONS FOR FORMWORK. FUNCTIONS: -Interpret the plans, carry out the corresponding measurements and stake out. -Construct and assemble the formwork for the concrete structures, adjusting to the ESSENTIAL specifications. Vehicle management courses and auxiliary means in construction are valued (NOT ESSENTIAL) Work and service contract. Full-time, Monday to Thursday from 8 am to 6 pm and Friday from 8 am to 2 pm Contact details: OFFER CODE: 132021000432 Interested candidates should send their CV indicating 432 and ID number to: OFERTASOECIUDADLINEAL@madrid.org Candidates that do not meet the requirements will not be taken into account. ESSENTIAL REQUIREMENT TO BE REGISTERED AS A JOB APPLICANT IN THE CORRESPONDING EMPLOYMENT OFFICE. IT IS REMEMBERED THAT THE SUBMISSION OF THE CV IMPLIES AUTHORIZATION FOR ITS REFERRAL TO THE CORRESPONDING COMPANY.
 - **ESCO code:** C7114
 - **Zoned:** Madrid
 - **Postal Code:** 12345
 4. WELDERS OF LIGHT METALLIC STRUCTURES
 - **Description:** Essential driving license and course in PRL. Preferably experience in automatic door repair.
 - **ESCO code:** C7114
 - **Zoned:** ES702 (NUTS code)
 - **Postal Code:** 12345

- 5. Install / maintainer / fire systems
 - **Description:** Install and maintain fire fighting equipment.
 - **ESCO code:** C7114
 - **Zoned:** Foral Community of Navarra
 - **Postal Code:** 12345

5.1 MACHINE OPERATOR TO MAKE PRECAST CONCRETE OR FIBER CEMENT / MACHINE OPERATOR TO MAKE PRECAST CONCRETE OR FIBER CEMENT

ID

- **ESCO code:** C7114
- **Description:** Precast concrete or fiber cement machine operators work with binding agents such as cement and concrete. They place the removable molds and pour cement into the molds. Afterwards, they carry out one or more actions to finish the cement: cutting, smoothing or leveling, compacting, polishing and beveling to avoid chipping.
- **Abilities:**
 1. Browse concrete structures
 2. Placing concrete forms for formwork
 3. Use safety equipment on construction sites
 4. Transport building materials
 5. Work ergonomically
 6. Use trowel to make concrete screed
 7. Recognize signs of corrosion
 8. Work as a team in construction crews
 9. Avoid damage to service infrastructure
 10. Control concrete curing processes
 11. Inspect received concrete
 12. Clean wooden surfaces
 13. Use measuring instruments
 14. React to events in critical environments for reasons of urgency
 15. Follow health and safety procedures in construction

RACE OFFER ANALYSIS

- No current courses have been located

5.2 SCREED / SCREED

ID

- **ESCO code:** C7114
- **Description:** Tilers create slab surfaces. They prepare the surface, installing bands to divide the sections. They then pour in the solution containing the cement and marble chips. Tilers finish the job by buffing the surface to ensure smoothness and shine.
- **Abilities:**
 1. Shred terrazzo
 2. Use measuring instruments

3. Avoid premature drying
4. Follow health and safety procedures in construction
5. Work ergonomically
6. Pouring terrazzo
7. Handle chemicals safely
8. Use trowel to make concrete screed
9. Grout the terrazzo
10. Prepare floors for laying terrazzo
11. Apply abrasive material to surface
12. Apply water-repellent membranes
13. Browse building materials
14. Transport building materials

RACE OFFER ANALYSIS

- No current courses have been located

6. ASSEMBLING AND WHITE WORK CARPENTERS C7115

JOB OFFERS

- Number of current job offers related to occupation: 748
- Percentage of offers related to occupation with respect to the total of the sector: 0.48%
 1. ALUMINIOZKO ETA PVCZKO LEIHOEN ETA EGITUREN MUNTATZAILEA // INSTALLER OF WINDOWS AND STRUCTURES OF
 - **Description:-** ALUMINIOZKO ETA PVCZKO LEIHOEN ETA EGITUREN MUNTATZAILEA (EZ ERREMENTARITZA). EZINBESTEKO BALDINTZAK: MUNTAKETA-PROZESU OSOAN ESPERIENTZIA IZATEA (LEIHOAK DESMUNTATU ETA JARTZEA, KRISTALAK JARTZEA, JUNKILOA JARTZEA, ERREMATATZEA ETA IGELTSEROTZA). ALDI BATERAKO KONTRATUA, KONTRATU MUGAGABEA EGITEKO AUKERAREKIN. LEHENBAILEHEN HASTEKO. - WINDOWS AND STRUCTURES ASSEMBLER OF ALUMINUM AND PVC (NO HARDWARE). ESSENTIAL REQUIREMENTS: EXPERIENCE IN THE COMPLETE ASSEMBLY PROCESS (REMOVING AND PLACING WINDOWS, GLAZING, PLACING TILE, FINISHING AND MASONRY). TEMPORARY CONTRACT WITH POSSIBILITY OF UNDEFINED. IMMEDIATE START Contact details: OFFER CODE: 162021000726 630305452 or 945160600 / www.lanbide.net.
 - **ESCO code:** C7115
 - **Zoned:** Biscay
 - **Postal Code:** 12345
 2. METALLIC OFFICER (REF.: 189)
 - **Description: FUNCTIONS:-** TIG and semi-automatic welding of light structures (corporeal letters, trays, etc.) in iron, aluminum and thin stainless steel. - Use of specific machinery (folding, saw, shear, curvature, etc.) - Subsequent verification of the result, etc. - Keep the work area in good condition. REQUIREMENTS: - Have demonstrable experience of at least 2 years in the required category and position. - Driving license, class B. - Experience in the use of folding machines, saw, shears, bending machines, etc. Essential knowledge of stainless steel and aluminum sheet welding - Prevention courses will be valued. - Proactive attitude. CONDITIONS: - Temporary contract for work or service. - Immediate incorporation. - Full time. - Hours from 8:00 am to 1:00 pm and from 2:00 pm to 5:00 pmadministracion@metalaser.net.
 - **ESCO code:** C7115
 - **Zoned:** Principality of Asturias
 - **Postal Code:** 12345
 3. OFFICIAL ALUMINIST 1ª, REFERENCE 04 2021 000145
 - **Description:** REQUIREMENTS: -2 years minimum of experience in the sector. - Driving license B FUNCTIONS: Manufacture, carpentry and assembly of aluminum and PVC LOCATION. Manacor DAY: Full (39h), Monday to Friday from 08-14h (30min break) and from 15: 30-18h SALARY: 19,664.38 CONTRACT: 12 months extendable Contact details: OFFER CODE: 042021000145 Interested and compliant people With the requirements, they can register at www.soib.es, private offer, reference 04 2021 000145.

- **ESCO code:** C7115
- **Zoned:** Balearic Islands
- **Postal Code:** 12345
- 4. ALUMINUM, METALLIC AND PVC CARPENTERS
 - **Description:** Description: 1st or 2nd officer with experience, under 50 years old. Necessary basic course on occupational risk prevention. Full-time and continuous temporary contract with the possibility of continuing. More information at the Ramón y Cajal Employment Office. Phone. 987 249 530 For more information go to Virtual Office Date of publication: January 28, 2021 Province: León.
- **ESCO code:** C7115
- **Zoned:** Lion
- **Postal Code:** 12345
- 5. GENERAL CARPENTERS
 - **Description:** YOU NEED A CARPENTER, 1ST OFFICER, WITH 24 MONTHS OF EXPERIENCE AND B CARD.
- **ESCO code:** C7115
- **Zoned:** Pontevedra
- **Postal Code:** 12345

6.1 CARPENTER / CARPENTER

ID

- **ESCO code:** C7115
- **Description:** Carpenters cut, shape, and assemble pieces of wood for the construction of buildings and other structures. They also use materials such as plastic and metal in their creations. Carpenters create the wood frames that support wood-frame buildings.
- **Abilities:**
 1. Interpreter plans in 2d
 2. Follow health and safety procedures in construction
 3. Smooth wooden surface
 4. Create wood joints
 5. Keep sawing equipment in good repair
 6. Interpreter plans in 3d
 7. Use measuring instruments
 8. Chalk lines
 9. Work ergonomically
 10. Join wooden elements
 11. Wood cutting techniques
 12. Use safety equipment on construction sites
 13. Identify warps in wood
 14. Browse building materials
 15. Types of wood
 16. Woodworking tools
 17. Transport building materials
 18. Clean wooden surfaces
 19. Classify wooden elements

- 20. Finish wood
- 21. Separate waste

RACE OFFER ANALYSIS

- No current courses have been located

6.2 KITCHEN INSTALLER / KITCHEN INSTALLER

ID

- **ESCO code:** C7115
- **Description:** Kitchen installers install kitchen items in homes. They take the necessary measures, prepare the room, remove old items if necessary and install the new kitchen equipment, including connecting the water, gas and sanitation supplies and electricity.
- **Abilities:**
 1. Follow health and safety procedures in construction
 2. Types of pipe materials and their uses
 3. Chalk lines
 4. Install ovens
 5. Plumbing tools
 6. Interpreter plans in 3d
 7. Use measuring instruments
 8. Install pvc pipes
 9. Browse building materials
 10. Work ergonomically
 11. Interpreter plans in 2d
 12. Download the merchandise
 13. Check the water pressure
 14. Install metal gas pipes
 15. Replace faucet
 16. Load the merchandise
 17. Electricity
 18. Use safety equipment on construction sites
 19. Install cooktops

RACE OFFER ANALYSIS

- No current courses have been located

6.3 WINDOW INSTALLER / WINDOW INSTALLER

ID

- **ESCO code:** C7115
- **Description:** Window installers place windows in frames and provide assistance. They remove the old windows if they are present, prepare the opening, mount the windows and place them in a square, straight, plumb or airtight shape.
- **Abilities:**

1. Handle glass
2. Cut home insulation
3. Place insulation strips
4. Use wedges
5. Use measuring instruments
6. Use safety equipment on construction sites
7. Cut insulation material to size
8. Apply spray foam insulation
9. Work ergonomically
10. Browse building materials
11. Install windows
12. Follow health and safety procedures in construction
13. Transport building materials
14. Install pan thresholds
15. Apply water-repellent membranes

- No current courses have been located

6.4 STAIR ERECTOR / STAIR ERECTOR

ID

- **ESCO code:** C7115
- **Description:** Stair assemblers place standard or custom staircases between different levels of buildings. They take the necessary measurements, prepare the site and install the ladder safely.
- **Abilities:**
 1. Woodworking tools
 2. Use measuring instruments
 3. Work as a team in construction crews
 4. Join wooden elements
 5. Use safety equipment on construction sites
 6. Browse building materials
 7. Interpreter plans in 3d
 8. Interpreter plans in 2d
 9. Position stringers
 10. Chalk lines
 11. Follow health and safety procedures in construction
 12. Finish wood
 13. Clean wooden surfaces
 14. Transport building materials
 15. Work ergonomically

RACE OFFER ANALYSIS

- No current courses have been located

6.5 DOOR ASSEMBLER / DOOR ASSEMBLER

ID

- **ESCO code:** C7115
- **Description:** Door fitters fit doors. They remove the old door if present, prepare the door frame, and fit the new door, either square, straight, plumb, or airtight, if requested. Door assemblers also inspect and service existing doors.
- **Abilities:**
 1. Handle glass
 2. Cut insulation material to size
 3. Apply water-repellent membranes
 4. Use wedges
 5. Work ergonomically
 6. Browse building materials
 7. Use safety equipment on construction sites
 8. Apply spray foam insulation
 9. Use measuring instruments
 10. Cut home insulation
 11. Follow health and safety procedures in construction
 12. Square doors
 13. Install locks
 14. Place insulation strips

RACE OFFER ANALYSIS

7. ROOFERS C7121

JOB OFFERS

- There are no current job offers in force

7.1 ROOF AND DECK MASON

ID

- **ESCO code:** C7121
- **Description:** Roof and deck masons cover structures with roofs. They install the supporting elements of a roof, be it flat or sloped, and then cover it with a waterproofing layer.
- **Abilities:**
 1. Recognize signs of rotting in wood
 2. Follow health and safety procedures in construction
 3. Interpreter plans in 2d
 4. Transport building materials
 5. Roof construction techniques
 6. Use measuring instruments
 7. Interpreter plans in 3d
 8. Work ergonomically
 9. Browse building materials
 10. Protect work areas
 11. Install insulation material
 12. Follow safety procedures when working at height
 13. Separate waste
 14. Inspect roofs
 15. Build wooden ceilings
 16. Prepare materials for laying roofs
 17. Use safety equipment on construction sites
 18. Install molded shingles

RACE OFFER ANALYSIS

1. Waterproofing using membranes formed with sheets.
 - **General objectives:** Execute and organize the waterproofing works of the flat roof and walls as a whole or their different elements - waterproofing membrane with bituminous and synthetic sheets, layers of slope formation, thermal insulation, technical documentation and the indications of the superior or person in charge, complying with the requirements established in matters of health and safety and quality, and collaborating in the control of risk prevention in their professional area.
 - **Modules**
 1. Pastes, mortars, adhesives and concretes
 2. Flat roofs and waterproofing systems.
 3. Bituminous membranes. 2159-3102-aeob-: evc official bulletin of the state 219 Thursday, September 12, 2013 sec. i. P. 68054
 4. Synthetic membranes.

5. Organization of roofing and waterproofing works.
 6. Basic prevention of occupational risks in construction.
2. Prepare pastes, mortars, adhesives and concretes. Level: 1
 - **General objectives:** Execute and organize the work of different formwork systems –pre-assembly of non-modular panels, commissioning of vertical and horizontal formwork, pre-assembly and commissioning of climbing formwork– as well as the commissioning, indications of the superior or manager, complying with the prescriptions established in matters of health and safety and quality, and collaborating in the control of risks in their professional area.
 - **Modules**
 1. Pastes, mortars, adhesives and concretes
 2. Roof skirts.
 3. Light metal structure for roofs.
 4. Boards and covers of formed sheet, panels and plates.
 5. Tile and slate roofs.
 6. Organization of roofing and waterproofing works.
 7. Basic prevention of occupational risks in construction.

8. PARQUETEROS AND FLOOR LAYERS C7122

JOB OFFERS

- There are no current job offers in force

8.1 TILER / TILER

ID

- **ESCO code:** C7122
- **Description:** Tilers install tiles on walls and floors. They cut the tiles to the proper size and shape, prepare the surface, and lay the tiles by squaring them carefully. Tilers can also carry out creative and artistic projects, with mosaics.
- **Abilities:**
 1. Tile
 2. Transport building materials
 3. Follow health and safety procedures in construction
 4. Use safety equipment on construction sites
 5. Cut tiles / tiles
 6. Browse building materials
 7. Work ergonomically
 8. Seal expansion joints
 9. Sanding techniques
 10. Fill tile / tile joints
 11. Use measuring instruments
 12. Types of adhesives for tile laying
 13. Plan tile placement
 14. Types of tiles
 15. Chalk lines
 16. Apply tile adhesive

RACE OFFER ANALYSIS

1. Compacting and curing of concrete
 - **General objectives:** null
 - **Modules**
 1. Auxiliary work tasks
 2. Pastes, mortars, adhesives and concretes

8.2 CARPENTER / CARPENTER

ID

- **ESCO code:** C7122
- **Description:** Carpenters use carpet rolls as floor covering. They cut the carpet to size, prepare the surface and lay the carpet.
- **Abilities:**

1. Place insulating material
2. Interpreter plans in 2d
3. Follow health and safety procedures in construction
4. Prepare floors for laying insulation material
5. Transport building materials
6. Work ergonomically
7. Types of rugs
8. Finishing carpet edges
9. Cutting carpet
10. Interpreter plans in 3d
11. Apply floor adhesive
12. Securing carpet seams
13. Use measuring instruments
14. Laying carpets
15. Browse building materials

RACE OFFER ANALYSIS

 1. Pastes, mortars, adhesives and concretes
 2. Flat roofs and waterproofing systems.
 3. Bituminous membranes. 2159-3102-aeob-: evc official bulletin of the state 219 Thursday, September 12, 2013 sec. i. P. 68054
 4. Synthetic membranes.
 5. Organization of roofing and waterproofing works.
 6. Basic prevention of occupational risks in construction.

8.3 PARQUET / PARQUET

ID

- **ESCO code:** C7122
- **Description:** Planks install floors made of solid wood. They prepare the surface, cut the parquet or the elements of the boards to measure, and place them following a predetermined pattern, squaring them well.
- **Abilities:**
 1. Filling drilled holes with nails in wooden planks
 2. Fix the parquet
 3. Interpreter plans in 3d
 4. Use measuring instruments
 5. Control environmental processing conditions
 6. Interpreter plans in 2d
 7. Work ergonomically
 8. Types of wood
 9. Transport building materials

10. Place insulating material
11. Browse building materials
12. Wood cutting techniques
13. Prepare Surfaces for Hardwood Flooring
14. Varnishing wooden surfaces
15. Identify warps in wood
16. Waxing wooden surfaces
17. Follow health and safety procedures in construction
18. Draw Floor Plan
19. Clean wooden surfaces
20. Smooth wooden surface
21. Join wooden elements

RACE OFFER ANALYSIS

JOB OFFERS

- There are no current job offers in force

9.1 PLASTER

ID

- **ESCO code:** C7123
- **Description:** Plasterers apply plaster made from plaster, cement, or other solutions to walls as a smooth finish. They mix dry plaster powder with water, then apply the resulting paste on a wall. The plaster is then smoothed out before it hardens and forms a solid coating on the wall.
- **Abilities:**
 1. Apply water-repellent membranes
 2. Follow health and safety procedures in construction
 3. Browse building materials
 4. Follow safety procedures when working at height
 5. Install insulation material
 6. Use measuring instruments
 7. Transport building materials
 8. Prepare surfaces for plastering
 9. Work ergonomically
 10. Apply adhesive wall coatings
 11. Open pipe galleries
 12. Plaster surfaces
 13. Types of plastering materials
 14. Handle chemicals safely

RACE OFFER ANALYSIS

- No current courses have been located

9.2 ROOFER / ROOFER

ID

- **ESCO code:** C7123
- **Description:** Roofers install roofs on buildings. They apply different techniques, as the situation requires, for example when fire resistance is especially important, or when space is needed between a collapsed roof and the next floor, or they specialize in just one.
- **Abilities:**
 1. Follow health and safety procedures in construction
 2. Use safety equipment on construction sites
 3. Maintain cleanliness of the work area

4. Browse building materials
5. Clean painting equipment
6. Place false ceilings
7. Use measuring instruments
8. Transport building materials
9. Paint surfaces
10. Work ergonomically
11. Protect surfaces during construction works

12.5 HEATING, VENTILATION AND AIR CONDITIONING SYSTEMS INSTALLER / HEATING, VENTILATION AND AIR CONDITIONING SYSTEMS INSTALLER

ID

- **ESCO code:** C7126
- **Description:** HVAC installers install and maintain gas, electric, oil, solid fuel, and multi-fuel heating and ventilation systems such as stand-alone heating and ventilation systems or integrated machinery and transportation equipment. They follow instructions and models, maintain systems, perform security checks, and repair systems.
- **Abilities:**
 1. Handle welding equipment
 2. Carry out regular machinery checks
 3. Read standard drawings
 4. Fuel types
 5. Flue gas
 6. Submitting products to testing
 7. Record test results
 8. Install heating pipes
 9. ventilation
 10. air conditioning and refrigeration
 11. Maintain installed equipment
 12. Use measuring instruments
 13. Solve equipment breakdowns
 14. Consult sources of technical documentation
 15. Install reheat ovens
 16. Install radiators
 17. Thermodynamics
 18. Use test equipment
 19. Operate welding tools

12.8 PIPELINE MAINTENANCE WORKER / PIPELINE MAINTENANCE WORKER

ID

- **ESCO code:** C7126
- **Description:** Pipeline maintenance workers use different equipment to maintain the suitability of the pipes. They perform drift checks and manage chemicals according to cleanup needs and goals (eg removal of corrosion).
- **Abilities:**
 1. Maintain good working relationships
 2. Use personal protective equipment
 3. Handle welding equipment
 4. Maintain pipe lining properties
 5. Take part measurements
 6. Follow verbal instructions
 7. Prevent pipeline deterioration
 8. Check pipes
 9. Maintain equipment
 10. Use lifting equipment
 11. Guarantee compliance with the regulations on driving infrastructures
 12. Apply health and safety regulations
 13. Test the pipeline infrastructure
 14. Pipe lining properties
 15. Follow written instructions
 16. Operate welding tools
 17. Handling chemicals

RACE OFFER ANALYSIS

1. Prl. in cement factories
 - **General objectives:** Apply the regulations on the Prevention of Occupational Risks in cement plants.
 - **Modules**
 1. Prl. in cement factories

12.9 SEWER WORKS OPERATOR / SEWER WORKS OPERATOR

ID

- **ESCO code:** C7126
- **Description:** Sewer works operators install sewer pipes to transport wastewater from structures to a water body or treatment plant. They dig trenches and feed the pipes, making sure they are angled correctly and connected properly. Sewer works operators also manufacture other elements of the sewer infrastructure, such as wells, and maintain and repair existing systems.
- **Abilities:**
 1. Pipe transport
 2. Level ground
 3. Use safety equipment on construction sites

4. Transport building materials
5. Mechanics
6. Work ergonomically
7. Construction site inspection
8. Avoid damage to service infrastructure
9. Test the pipeline infrastructure
10. React to events in critical environments for reasons of urgency
11. Digging techniques
12. Assemble pipeline elements
13. Browse building materials
14. Follow health and safety procedures in construction
15. Forming pipe beds
16. Detect flaws in the pipeline infrastructure
17. Use measuring instruments
18. Protect work areas
19. Digging trenches for sewer
20. Laying sewer pipes
21. Prevent pipeline deterioration
22. Mechanical systems

12.11 INSTALLATION AND MAINTENANCE TECHNICIAN OF IRRIGATION SYSTEMS / INSTALLATION AND MAINTENANCE TECHNIQUE OF IRRIGATION SYSTEMS

ID

- **ESCO code:** C7126
- **Description:** Irrigation system installation and maintenance technicians specialize in the installation, maintenance, and repair of sprinklers, pipes, and other irrigation systems. They use machinery to handle irrigation systems and ensure compliance with environmental regulations.
- **Abilities:**
 1. Keep irrigation systems competencies up-to-date
 2. Conditioning irrigation systems
 3. Install irrigation systems
 4. Calculate the pressure of the irrigation system
 5. Sprinkler types
 6. Irrigation systems
 7. Install pipe networks
 8. Maintain irrigation systems
 9. Install sprinkler systems
 10. Water pressure
 11. Maintain irrigation control systems
 12. Guarantee compliance with environmental legislation

RACE OFFER ANALYSIS

- No current courses have been located

12.12 SEWER NETWORK MAINTENANCE TECHNICIAN / SEWER NETWORK MAINTENANCE TECHNICIAN

ID

- **ESCO code:** C7126
- **Description:** Sewer network maintenance technicians maintain sewer systems that remove and transport wastewater and sewage. They inspect pipes, pump stations, and pipeline, look for leaks or other faults, and fix potential problems. They clear blockages and carry out maintenance tasks, using network maps and specialized computer programs.
- **Abilities:**
 1. Test the pipeline infrastructure
 2. Guarantee compliance with the regulations on driving infrastructures
 3. Repair pipes
 4. Keep records of maintenance interventions
 5. Use personal protective equipment
 6. Manage sinks
 7. Apply health and safety regulations
 8. Drive pumps
 9. Interpreter maps

10. Check pipes
11. Detect flaws in the pipeline infrastructure
12. Prevent pipeline deterioration
13. Types of pipes

RACE OFFER ANALYSIS

 10. Remove contaminants
 11. Health legislation
 12. safety and hygiene
 13. Store contaminated materials
 14. Radiation protection
 15. Radioactive contamination

RACE OFFER ANALYSIS

1. Prl. in cement factories
 - **General objectives:** Apply the regulations on the Prevention of Occupational Risks in cement plants.
 - **Modules**
 1. Prl. in cement factories

16.6 ASBESTOS REMOVAL OPERATOR / ASBESTOS REMOVAL OPERATOR

ID

- **ESCO code:** C7133
- **Description:** Asbestos removal workers remove asbestos from buildings and other construction in accordance with health and safety regulations for handling hazardous materials. They investigate the intensity of asbestos contamination, prepare the structure for removal, and prevent contamination of other areas.
- **Abilities:**
 1. Avoid pollution
 2. Rules on exposure to pollution
 3. Remove contaminants
 4. Disinfect surfaces
 5. Health legislation
 6. safety and hygiene
 7. Investigate contamination
 8. Store contaminated materials
 9. Use personal protective equipment
 10. Rules regarding asbestos removal
 11. Remove contaminated materials

RACE OFFER ANALYSIS

1. Prl. in cement factories
 - **General objectives:** Apply the regulations on the Prevention of Occupational Risks in cement plants.
 - **Modules**
 1. Prl. in cement factories

16.7 CHILL CASTING OPERATOR / CHILL CASTING OPERATOR

ID

- **ESCO code:** C7133
- **Description:** Chill casting operators manufacture parts, including pipes, tubes, hollow sections and other first-stage products of steel, using manual handling equipment in a foundry. They direct the flow of molten ferrous and non-ferrous metals to the shells, paying attention to creating the exact right circumstances to obtain the highest quality metal. They observe the flow of metals to identify faults. In the event of a fault, they notify authorized personnel and participate in eliminating the fault.

- **Abilities:**
 1. Repair shell molds
 2. Extract products from shell molds
 3. Solve operational problems
 4. Join shell mold components
 5. Select shell mold types
 6. Assemble metal parts
 7. Ensure uniformity of shell molds
 8. Moving filled shell molds
 9. Process metal work orders

RACE OFFER ANALYSIS

- No current courses have been located

16.8 EXTERIOR BUILDING CLEANER / EXTERIOR BUILDING CLEANER

ID

- **ESCO code:** C7133
- **Description:** Building exterior cleaners remove dirt and debris from the exterior of a building and carry out restoration work. They ensure that cleaning methods are in accordance with safety standards and monitor the exteriors to ensure they are in good condition.
- **Abilities:**
 1. Cleaning the facade of a building
 2. Apply technical spray
 3. Avoid pollution
 4. Cleaning the floor of a building
 5. Operate pressure washers
 6. Hygiene and safety measures in the cleaning industry
 7. Protect work areas
 8. Use personal protective equipment
 9. Detect building damage
 10. Cleaning techniques
 11. Remove contaminants

RACE OFFER ANALYSIS

- No current courses have been located

17. EARTHMOVING AND RELATED MACHINE OPERATORS C8342

JOB OFFERS

- There are no current job offers in force

17.1 BULLDOZER OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Bulldozer operators operate a heavy vehicle to move over terrain with dirt, debris, or other materials.
- **Abilities:**
 1. Follow health and safety procedures in construction
 2. Digging techniques
 3. Mechanical systems
 4. Digging terrain with mechanical means
 5. Mechanical tools
 6. Keep heavy construction equipment in good repair
 7. Operate global positioning systems
 8. Use safety equipment on construction sites
 9. Work ergonomically
 10. React to events in critical environments for reasons of urgency
 11. Drive crawler tractors
 12. Transport land
 13. Avoid damage to service infrastructure
 14. Construction site inspection
 15. Be aware of the risks of dangerous goods
 16. Driving heavy mobile construction equipment
 17. Work as a team in construction crews

RACE OFFER ANALYSIS

- No current courses have been located

17.2 DREDGE OPERATOR / DREDGE OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Dredger operators work with industrial equipment to remove underwater material and make the area accessible to ships, establish ports, lay cables or for other purposes, and move the material to the desired location.
- **Abilities:**
 1. Mechanical systems

2. Dredging systems control panels
3. Position dredging machines
4. Follow health and safety procedures in construction
5. Maintain dredging equipment
6. Use safety equipment on construction sites
7. Avoid damage to service infrastructure
8. Work ergonomically
9. Measure the depth of the water

RACE OFFER ANALYSIS

- No current courses have been located

17.3 EXCAVATOR OPERATOR / EXCAVATOR OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Excavator operators use bulldozers to dig up dirt or other materials to remove them. They participate in various projects, such as demolition, dredging, digging holes, foundations and trenches.
- **Abilities:**
 1. Driving heavy mobile construction equipment
 2. Construction site inspection
 3. Mechanical tools
 4. React to events in critical environments for reasons of urgency
 5. Work ergonomically
 6. Follow health and safety procedures in construction
 7. Avoid damage to service infrastructure
 8. Level ground
 9. Use safety equipment on construction sites
 10. Digging techniques
 11. Keep heavy construction equipment in good repair
 12. Digging trenches for sewer
 13. Be aware of the risks of dangerous goods
 14. Operate global positioning systems
 15. Operate excavators
 16. Provide the right tools for machines
 17. Digging terrain with mechanical means
 18. Mechanical systems

RACE OFFER ANALYSIS

- No current courses have been located

17.4 OPEN PIT MINING FACILITY OPERATOR / OPEN PIT MINING FACILITY OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Operators of open pit mining facilities control heavy equipment, such as excavators and dump trucks, which often involve a high level of spatial awareness, to excavate, load and transport minerals, raw minerals, such as sand, stones and clay, and overburdening in quarries and surface mines.
- **Abilities:**
 1. Facing problems with a critical attitude
 2. Inspect heavy equipment for surface mining
 3. Communicate information about mining equipment
 4. React to events in critical environments for reasons of urgency
 5. Handle mining tools
 6. Impact of geological factors on mining operations
 7. Transmit information to operators on other shifts
 8. Withstand pressure in unexpected situations
 9. Mechanics
 10. Make operational decisions autonomously
 11. Solve operational problems
 12. Perform minor repairs on equipment
 13. Digging techniques

RACE OFFER ANALYSIS

- No current courses have been located

17.5 MOTOR GRADER OPERATOR / MOTOR GRADER OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Motor grader operators work with heavy mobile equipment that creates a flat surface by cutting through the upper ground with a large blade. They typically provide a flat finish on heavy earthmoving work performed by scraper and excavator operators.
- **Abilities:**
 1. Drive leveling machines
 2. Work as a team in construction crews
 3. Work ergonomically
 4. Follow health and safety procedures in construction
 5. React to events in critical environments for reasons of urgency
 6. Operate global positioning systems
 7. Mechanical tools
 8. Be aware of the risks of dangerous goods
 9. Driving heavy mobile construction equipment
 10. Keep heavy construction equipment in good repair
 11. Use safety equipment on construction sites
 12. Construction site inspection

RACE OFFER ANALYSIS

- No current courses have been located

17.6 COMPACTOR MACHINE OPERATOR / COMPACTOR MACHINE OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Compactor machine operators work with equipment to compact a number of materials, such as dirt, gravel, concrete or asphalt, in road and foundation construction. They walk behind, or sit on top of the compactor, depending on their type and size, and roll over the area to be compacted.
- **Abilities:**
 1. Avoid damage to service infrastructure
 2. Driving heavy mobile construction equipment
 3. Follow health and safety procedures in construction
 4. Construction site inspection
 5. Technical compaction
 6. Operate global positioning systems
 7. Keep heavy construction equipment in good repair
 8. Drive compactors
 9. Work ergonomically
 10. React to events in critical environments for reasons of urgency
 11. Use safety equipment on construction sites
 12. Work as a team in construction crews
 13. Mechanical systems
 14. Be aware of the risks of dangerous goods
 15. Mechanical tools

RACE OFFER ANALYSIS

- No current courses have been located

17.7 PILE DRIVING MACHINE OPERATOR / PILE DRIVING MACHINE OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Pile driver operators work with heavy equipment that places the piles and hammers them into the ground using a rigging mechanism.
- **Abilities:**
 1. Driving concrete piles
 2. Mechanical systems
 3. Construction site inspection
 4. Work ergonomically
 5. Securing heavy construction equipment
 6. Placing caps and liners on concrete piles
 7. React to events in critical environments for reasons of urgency
 8. Use safety equipment on construction sites
 9. Mechanical tools
 10. Driving steel piles
 11. Keep heavy construction equipment in good repair
 12. Avoid damage to service infrastructure

13. Follow health and safety procedures in construction
14. Operate ram
15. Crane load diagrams

RACE OFFER ANALYSIS

- No current courses have been located

17.8 SNOW PLOW OPERATOR / SNOW PLOW OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Snowplow operators drive trucks and plows to remove snow and ice from sidewalks, streets, and other public places. They also throw salt and sand on the ground to thaw the places in question.
- **Abilities:**
 1. Adapt to different climatic conditions
 2. Fill in a descriptive sheet of cleaning activities
 3. Carry out de-icing activities
 4. Drive a snow plow truck
 5. Safety risks in snow removal activities
 6. Remove snow
 7. Use personal protective equipment
 8. Follow the organizational rules of the cleaning sector
 9. Carry out cleaning activities outside
 10. Use snow plows
 11. Implement measures to prevent safety risks in snow removal procedures

RACE OFFER ANALYSIS

- No current courses have been located

17.9 SCRAPER OPERATOR / SCRAPER OPERATOR

ID

- **ESCO code:** C8342
- **Description:** Scraper operators work with a moving piece of heavy equipment that scrapes the top layer of soil and deposits it in a hopper for transport. They drive the scraper over the surface to be scraped, adapting the speed of the machine to the hardness of the surface.
- **Abilities:**
 1. Mechanical systems
 2. Digging terrain with mechanical means
 3. Avoid damage to service infrastructure
 4. Mechanical tools
 5. Use safety equipment on construction sites
 6. Keep heavy construction equipment in good repair
 7. Work ergonomically

8. Operate global positioning systems
9. Follow health and safety procedures in construction
10. Handling a construction scraper
11. Transport land
12. Driving heavy mobile construction equipment
13. Work as a team in construction crews
14. Be aware of the risks of dangerous goods
15. React to events in critical environments for reasons of urgency
16. Construction site inspection

RACE OFFER ANALYSIS

- No current courses have been located

17.10 HIGHWAY CONSTRUCTION WORKER / HIGHWAY CONSTRUCTION WORKER

ID

- **ESCO code:** C8342
- **Description:** Road construction workers carry out road construction works on land, substructure work and the pavement section of the carriageway. They cover the compacted soil with one or more layers. Typically, road construction workers lay out a bed of stabilizing sand or clay before adding asphalt or concrete slabs to finish a road.
- **Abilities:**
 1. Use safety equipment on construction sites
 2. Transport building materials
 3. Work ergonomically
 4. Level ground
 5. Prepare esplanades to build road
 6. Avoid damage to service infrastructure
 7. Handle chemicals safely
 8. Browse building materials
 9. Work with hot materials safely
 10. Elevations terrain plan
 11. Laying intermediate layers
 12. Perform drainage operations
 13. Paving Asphalt Layers
 14. Follow health and safety procedures in construction
 15. Install frost protection materials

RACE OFFER ANALYSIS

- No current courses have been located

18. CRANE, LIFTING EQUIPMENT AND RELATED OPERATORS C8343

JOB OFFERS

- There are no current job offers in force

18.1 AUTOMATED ROPEWAY CONTROLLER / AUTOMATED ROPEWAY CONTROLLER

ID

- **ESCO code:** C8343
- **Description:** Automated ropeway controllers use control panels and systems that keep the operations of a diverse set of cable-operated modes of transport under control. They can operate air cabins, cable cars, funiculars, etc. They guarantee continued operations and intervene in operations when unforeseen situations occur.
- **Abilities:**
 1. Health and safety measures in transport
 2. Stay alert
 3. Comply with the work schedule of the transport companies
 4. Follow signaling instructions
 5. Inspect crane equipment
 6. Cable transport systems
 7. Risks on board
 8. Transmit instructions verbally

RACE OFFER ANALYSIS

- No current courses have been located

18.2 PRODUCTION FACILITY CRANE OPERATOR / PRODUCTION FACILITY CRANE OPERATOR

ID

- **ESCO code:** C8343
- **Description:** Production facility crane operators operate the basic technological cranes during the production process in the given unit, lifting and moving loads (bales, containers, buckets and other facilities) with raw materials and other materials.
- **Abilities:**
 1. Handle merchandise
 2. Determine the load on the crane
 3. Apply various facelift techniques
 4. Follow safety procedures when working at height
 5. Operate cranes
 6. Determine the center of gravity of the load
 7. Act as liaison with freight carriers
 8. Operate lifting equipment
 9. Handle railroad track shifters

RACE OFFER ANALYSIS

- No current courses have been located

18.3 MOBILE CRANE OPERATOR / MOBILE CRANE OPERATOR

ID

- **ESCO code:** C8343
- **Description:** Mobile crane operators work with a variety of crane types that can easily navigate road, rail and water. Mobile cranes are often installed on trucks.
- **Abilities:**
 1. Assemble a skull
 2. React to events in critical environments for reasons of urgency
 3. Operate global positioning systems
 4. Mount loads
 5. Mechanics
 6. Crane load diagrams
 7. Construction site inspection
 8. Work ergonomically
 9. Use safety equipment on construction sites
 10. Mechanical systems
 11. Securing heavy construction equipment
 12. Interpreter plans in 3d
 13. Keep heavy construction equipment in good repair
 14. Driving heavy mobile construction equipment
 15. Interpreter plans in 2d
 16. Follow health and safety procedures in construction
 17. Operate mobile cranes

RACE OFFER ANALYSIS

- No current courses have been located

18.4 CONTAINER GANTRY CRANE OPERATOR / CONTAINER GANTRY CRANE OPERATOR

ID

- **ESCO code:** C8343
- **Description:** Container gantry crane operators operate electric cranes that are equipped with cantilevers that are supported by lifting equipment to load or unload container cargo. They place the towers in position next to the vessel and the lower overhangs on the deck or hold of a vessel. They lift and transport containers along the cantilever and place them on the dock, on the ship's deck or in the hold.
- **Abilities:**
 1. Perform high-risk work
 2. Operate cranes
 3. Verify the quality of the products in the production chain

4. Charts of load for the transport of merchandise
5. Carry out regular machinery checks
6. Assemble a skull
7. Assist in handling heavy loads
8. Inspect crane equipment
9. Stay alert
10. Maintain the cranes
11. Organize the weight of the load according to the capacity of the lifting equipment
12. Loading the merchandise on the ships
13. Handle railroad track shifters

RACE OFFER ANALYSIS

- No current courses have been located

18.5 TOWER CRANE OPERATOR / TOWER CRANE OPERATOR

ID

- **ESCO code:** C8343
- **Description:** Tower crane operators work with tower cranes, height balancing cranes consisting of a horizontal arm mounted on a vertical mast, along with the necessary motors and the lifting hook attached to the arm. Operators control the crane inside a control cabin or use radio control.
- **Abilities:**
 1. Work ergonomically
 2. Construction site inspection
 3. React to events in critical environments for reasons of urgency
 4. Interpreter plans in 2d
 5. Crane load diagrams
 6. Follow health and safety procedures in construction
 7. Work as a team in construction crews
 8. Mechanical tools
 9. Use safety equipment on construction sites
 10. Securing heavy construction equipment
 11. Operate tower cranes
 12. Keep heavy construction equipment in good repair
 13. Interpreter plans in 3d
 14. Mechanical systems
 15. Follow safety procedures when working at height

19. CONCLUSION

Based on the Big Data tracking carried out on the EURES employment portal, companies are demanding professional profiles corresponding to the following ESCO occupations (in order from highest to lowest demand):

- 7112 bricklayers and refiners
- 7115 Carpenters and cabinetmakers
- 7126 Plumbers and pipe fitters
- 7119 Construction and allied trades workers, not elsewhere classified
- 7127 Air conditioning and refrigeration mechanics
- 7131 Painters and related
- 7114 Concrete setters, concrete finishers and the like

The training needs, conceived from the perspective set forth in the Introduction to this report, must be consistent with the skills necessary to exercise the profession with solvency and which have been defined in the "Identification" section of each occupation.

It is noted that there is sufficient training available for the following high-demand occupations:

- 7112 bricklayers and refiners
- 7115 Carpenters and cabinetmakers
- 7126 Plumbers and pipe fitters
- 7131 Painters and related

At the time of extracting the information, the **lack of training offer** related to high demand occupations, such as:

- 7119 Construction and allied trades workers, not elsewhere classified. Courses that should be promoted:
 - Basic work in tubular scaffolding assembly.
 - Scaffolding erection.
 - Organization and supervision of scaffolding assembly.
 - Vertical works.
 - Confined spaces
 - Safety at height.
 - Anchorage installation.
 - Demolition and rehabilitation workers.
- 7127 Air conditioning and refrigeration mechanics. Courses that should be promoted:
 - Installation of air conditioning and air conditioning equipment.

- Maintenance of air conditioning systems.
 - Thermal installer of buildings.
 - Development of air conditioning installation projects.
 - Energy efficiency in buildings.
- 7114 Concrete setters, concrete finishers and the like. Courses that should be promoted:
 - Operations prior to concreting
 - Concrete transfer and pouring.
 - Compacting and curing of concrete.
 - Pastes, mortars, adhesives and concretes.
 - Construction of foundations and sanitation.
 - Vertical formwork construction.
 - Horizontal formwork erection.
 - Pre-assembly of non-modular formwork panels.
 - Pre-assembly and erection of climbing formwork.
 - Organization of formwork and concrete formwork erection works.
 - Moulds specialist: formwork worker.

On the other hand, they have a supply of training in low-demand occupations such as:

- 7121 Roofers
- 7122 Floor and tile fixers
- 7132 Painters and varnishers
- 7133 Building structure cleaners

20. BELGIAN CASES

The following is the occupational analysis for the Belgian case. The list of ESCO occupation skills is omitted as they are identical for any country.

21. HOME BUILDERS C7111

JOB OFFERS

- Number of current job offers related to the profession: 36
- Percentage of offers related to the profession compared to the total of the sector: 0.02%
 1. Maintenance technician / sales technician M / F / X
 - **Description:**
Technical
 Realization, technical and administrative follow-up of worksites and maintenances that you manage in the following techniques:
 - Fire extinguishers
 - Reels
 - Safety lights
 Carrying out repairs
 Advice to your customers, you generate quotes and are a source of proposals
 You may need to provide technical support if needed
 You carry out your administrative tasks digitally and 100% dematerialized
Commercial
 Development of sales, loyalty of existing customers by offering new products and services and ensuring their follow-up (contact, advice, order taking),
 - A varied job with real development prospects
 - A competitive salary to match your talent
 - Various extralegal benefits (hospitalization insurance, meal vouchers, company van, mobile phone, etc.);
 - A pleasant working environment within a highly motivated team
 - An investment in training and the acquisition of new skills
 - Skillful with your hands, you have boundless energy and a deep desire to evolve
 - Dynamic, organizational skills, motivated.
 - You are able to work independently and in a team
 - Possess the B license
 - Experience in the fire industry and a good knowledge of Dutch are strong assets
 - **ESCO code:** C7111
 - **Zoned:** Sint-Stevens-Woluwe
 - **Postal code:** 1932
 2. Worker-janitor M / F / X
 - **Description:**
 Missions
 As a construction worker, you will be required to:
 - carry out small repairs and work such as:
 - o Plumbing: assembly of elements (taps, flushing, ç), interventions on leaks with the available material.
 - Electricity: replacement of lighting elements (tubes, bulbs, ç), knowledge of switchboards, reading of electrical plans.

- Miscellaneous work: to have the hand for small jobs (repairs, small adjustments) on tiling, partitions, plastering, joinery.
- Be able to transport items during removals, arrangements of premises, etc.

As a building concierge, you will be required to:

- be reachable by the management and members of the Galileo steering committee on working days from 7 a.m. to 10 p.m.
- be the first relay for external building surveillance services (G4S)
- collaborate in the organization of meetings, evening events
- carry out rounds of the buildings on the site (including car parks) ending after the departure of the cleaning teams
- control the closing of doors and windows, extinction of lamps, vigilance as to the closing of electrical devices that justify it
- ensure the opening of the building doors from 7:00 a.m. and guarantee the evacuation of waste according to the directives of Brussels environment (placing of bins on the public highway)
- welcome suppliers outside of school opening hours
- guarantee, outside of his legal holidays, a 24-hour on-call and duty service for all urgent interventions, such as: fire, flood, storms, serious accidents, etc.
- be able to guide any external actor who requires it to the technical installations of the building. If necessary, be able to shut down the following installations in the event of danger: water, gas, heating, etc.
- take good care of the accommodation made available to him

The above list includes the activities and tasks of the job. However, this is not a complete and detailed list. The person in place may therefore be required to carry out other activities within the framework of his job.

Features of the function

The function, which is that of worker-concierge of the buildings of the Galileo Campus, is exercised in collaboration with the SIPP manager and the building manager, and under the hierarchical and functional authority of the directions of the pedagogical and paramedical departments in collaboration with the Galileo management committee

Worker's contract in accordance with the scale in force, including a benefit in kind by the provision of a staff apartment, charges included (water, gas and electricity, internet).

You have technical and computer knowledge related to the use of the technical devices that he has to handle (alarms, shutdown of certain systems, etc.)

- You have skills allowing you to ensure small jobs and repairs (knowledge of plumbing, heating, electricity and painting)
 - You can manage priorities
 - You are rigorous and respect your commitments
 - You are persevering, dynamic and reliable
 - You demonstrate availability and adaptability
 - You have a sense of service
- **ESCO code:** C7111
 - **Zoned:** Schaerbeek
 - **Postal code:** 1030

3. +65 - Maintenance and storage support M / F / X

▪ **Description:**

The function is logistical support, stock and maintenance manager. Suggested schedule is from 2 p.m. to 8 p.m. Monday to Friday and 9 a.m. to 1 p.m. Saturday

- deposit of green waste at the sorting center (driving van and trailer) - BE license
- maintenance of vehicles and their contents (washing interior and exterior vans, disembarking assistance, storage, preparation for the following work sites)
- maintenance of gardening machines (routine maintenance, diagnostics, storage, shipping / deposit and monitoring of repairs)
- maintenance of the hangar, stock and premises (cleaning, storage, stock monitoring)
- equipment maintenance (cleaning, storage, inventory monitoring)
- goods stock manager (reception and storage of stock) - clark management
- preparation of goods (planting, plaster, ...)
- reception, removal of goods and tools from suppliers (monitoring of the stock of tools)

It is requested to be able to follow the protocol which is in place.

The position is therefore so that the site team can rely on the management of the hangar and stocks.

CDD 1 month then 6 months and CDI if satisfactory

Customizable schedule

Lonely and responsible work

Ideally, someone with experience in the green sector.

It is especially necessary that the person likes to work in a solitary way but that he knows how to communicate with the rest of the team (FR / EN).

- autonomous
- ordered
- resourceful
- respectful
- responsible
- of confidence
- know how to make written reports
- **ESCO code:** C7111
- **Zoned:** Meise
- **Postal code:** 1860

4. auxiliary worker - technical service and maintenance M / F / X

▪ **Description:**

Mission: Help with various building completion and maintenance work within the technical service; help with various building maintenance work within the cleaning service.

Main tasks :

- **Operational tasks:**
- Assistance with painting, masonry, electricity, carpentry, plumbing, flooring, roofing and repairs of all kinds in the building sector.
- Help in maintenance work by strengthening the team of surface technicians.

We propose :

- * A fixed-term contract of one year full-time, possibly renewable;
- * Days of annual leave + extra-legal days + compensatory days in the summer schedule;
- * A valued seniority;
- * An intervention in public transport costs (100% for STIB and 80% for other transport)
- * Specific training;
- * Great ease of access:
 - Uccle Calevoet station (+ De Lijn)
 - Tram / bus: 4/43/51 // 97/82/98

Entry profile:

Required Skills:

- Rigor;
- Autonomy and versatility;
- Availability and flexibility
- Resistance to stress and change;
- Ability to work in a team
- Respect for the hierarchical line
- Proven experience in construction is a plus;
- Basic written and oral knowledge of the second language (Selor Art. 8 ç10 certificate) is a plus.

Diploma required : No diploma required

- **ESCO code:** C7111
- **Zoned:** Uccle
- **Postal code:** 1180

5. Employee technician - electrician M / F / X

▪ **Description:**

As a technician employee your tasks are very diverse. You are responsible for all kinds of missions, chores and repairs such as painting or sanitary maintenance, but you are also responsible for preventive maintenance of building services such as lighting.

Besides that technical tasks are also part of your function; for example the placement of electrical materials (cables, plugs, ...).

You are the contact person for suppliers for orders as well as deliveries of maintenance materials or furniture.

-A full-time contract of indefinite duration; -The project has a duration of 1 year and a maximum of 1.5 years; -An exciting and stimulating job near you; -A flexible schedule; -A large team of motivated colleagues.

- You have the B license;

-You have a first experience as a logistics employee / technician; -You are skilled with your hands; -You have a sense of responsibility.

1. TECHNICIAN - INDUSTRIAL WATER TREATMENT (M / F / X)

▪ **Description:**

iServ is looking for two technicians for industrial water treatment plants (one Dutch-speaking and one bilingual / French-speaking).

ISERV specializes in the indoor treatment of industrial water (process water) and drinking water.

As a technician in the field of water treatment, you will be responsible for carrying out missions for water treatment installations at our industrial customers.

You will study, control and adjust the installations when necessary for the proper functioning of the installations (reverse osmosis, ion exchange, ultrafiltration, softening, demineralization, decontamination).

You point out any malfunctions or incidents, which you try to resolve on your own as your experience grows.

You take care of the preventive maintenance of the installations,

You install, clean and replace resins, filtering equipment,

You connect the pipes,

You detect leaks,

You fill the tanks,

You resolve mechanical and, to some extent, electrical faults with the technician (s).

You must consult with the engineer responsible for the project.

You provide a concise work report.

You have your own vehicle for your tasks - also for private use - a smartphone and a laptop.

You are versatile and want to specialize thanks to your experience and your thirst for learning.

You help determine the client's prevention policy,

You listen to their issues and make suggestions for future maintenance and technical needs.

You have a certain flexibility depending on the mission, the organization of the work and the needs of the clients.

You visit the facilities regularly in Belgium and occasionally in the Netherlands and France.

In the event of an unexpected system malfunction, you are available.

You receive a very attractive salary and are paid according to your work, your responsibilities and your knowledge.

Your tasks:

Area: Technical assistance and customer support

Discipline: Mechanics, systems and processes; Chemistry and Materials Science

- Measure and record data in laboratory transcripts, databases, registers and reports,
- Perform measurements and analyzes,
- Identify the problems,
- Make technical adjustments.

38. CONCLUSION

Based on the Big Data crawl carried out on the EURES job portal, companies are demanding 3 professional profiles, which constitute more than 60% of the demands, corresponding to the following ESCO occupations (in order of highest to lowest demand):

- Plumbers and Pipefitters C7126
- Carpenters and Joiners C7115
- Masons C7112

Accordingly, training related to the following courses should be promoted:

- Plumbers and Pipefitters C7126.

- Water supply and distribution and sewerage networks and installations
- Development of works of water supply and distribution and sanitation networks and installations
- Water and sewerage network commissioning systems
- Organization of the maintenance of water distribution and sanitation networks.
- Plumber installer.
- Technician in heating installations.
- Industrial piping technician.

- Carpenters and Joiners C7115

- Assembly of furniture and elements of carpentry
- Furniture installation projects
- Furniture installations
- Application of surface finishing products in carpentry and furniture.
- Adjustment and finishing of furniture installations
- Measurements for the installation of furniture elements
- Assembly and installation of doors and windows
- Installation of furniture structures

- Masons C7112

- Pastes, mortars, adhesives and concretes
- Masonry works for cladding
- Process and preparation of equipment and means in masonry - masonry work.
- Execution of masonry for cladding.
- Execution of facing masonry works
- Execution of facing masonry
- Execution of masonry walls

At a lower level, but with a notable demand, are the following professional profiles (in order of greater or lesser demand):

- Refrigeration and air conditioning mechanics C7127
- Roofers and drywallers C7121
- House Painters and Wallpaperers C7131
- Reinforcing Concrete Builders, Stonemasons and Related Occupations C7114
- Floor covering installers and tilers C7122
- Heat and sound insulators C7124
- Facade Repairers and Chimney Sweeps C7133
- Plasterers C7123

Finally, with an almost null or non-existent demand are the following professional profiles:

- House Builders C7111
- Glaziers C7125
- Skilled Building Trades and Related Occupations not Elsewhere Classified C7119
- Painters, varnishers, and related workers C7132
- Drivers of earthmoving and similar equipment C8342
- Operators of cranes and other lifting and similar equipment C8343

The training needs in those occupations in high demand, conceived from the perspective set out in the Introduction to this report, must be coherent with the description of what is required to exercise the profession with solvency, and which have been defined in the "Identification" section of each occupation.

Analyzing the number of training offers related to each occupation shows a high correlation between occupations with demand and training offers to train workers in these occupations.

Only two situations are detected where the training offer is present and the demand from companies is almost null.

- Operators of earthmoving and similar equipment C8342
- Operators of cranes and other lifting and similar equipment C8343

39. IRISH CASE

Before analyzing the Irish case, it should be borne in mind that this is a geographical area in which there is no great centralization of training offers in a reference portal, nor is the EURES job portal widely used. Therefore, in the results extracted through the tool, job offers and / or course offers are not detected in a lot of occupations.

The following is the occupational analysis for the Irish case. The list of skills of the ESCO occupation is omitted as they are identical for any country.

 2. Civil / Structural Engineer - Scaffolding Design-0119
 - **Description**We have a Civil / Structural Engineer position with our client in the Dublin area that is rapidly expanding in a Construction Industry.

Keltia Ireland is a technical support services company providing CAD training, engineering design, and a broad range of technical recruiting services to customers in the Aerospace, Automotive, Pharma, Food & Beverage and Medical Device industries on a permanent and contractual basis.

For full information, open the link - <https://bit.ly/34oH9XD>

Job Description 3-5 years of experience working with scaffold designs (preferably system scaffolds) Layher System scaffold, Cuplok, Kwikstage, and Plus 8.

It is ideal that the candidate use the blocks that are pulled from the manufacturer's software, as it is more accurate than trying to “make” your own blocks. There are also software suppliers that have all the blocks from many scaffold supplies integrated in their own software, such as Avontus, smart scaffolder and scaffold designer. And from this we would also expect to receive a bill of materials from the designer stating how much scaffold is required. Accurate values of the scaffolding are also important as we would need weights for leg loads and imposed loads to existing structures. BIM and REVIT would be GOOD BONUS. Please send a CV in Word .doc format with availability & pay requirements on CV to:

 - **Zoned**Dublin, County Dublin, Ireland
 - **Postal Code: 1000**

 - Percentage of offers related to occupation with respect to the total of the sector: 0.00%
 1. Underfloor Heating Installer - Trainee position
 - **Description**A fantastic opportunity has arisen to get involved in the warm-water underfloor heating industry.
JK Floorheating is a provider of in-ground underfloor heating (UFH) systems for residential and commercial buildings. We operate in 10 European countries and have been serving the Dutch and German markets for more than 25 years. We are an innovative technology company working on environmentally friendly heating solutions, offering a very unique product into the Irish market. Our installation method is becoming increasingly specified within the renovation, refurbishment and 'change of use' sector of the building industry.
JK Floorheating are currently recruiting for full-time trainee installers to join our international underfloor heating company at our newly opened office in Rathcoole Co. Dublin.
As a Trainee Installer you will be responsible for planned and reactive installation and service whilst working under the supervision of Senior UFH Installer. You will work nationwide (Ireland) within the domestic and commercial industry, mainly based in the Dublin region but occasional overseas travel and additional work in the UK and Northern Ireland may be required for brief periods at a time with overnight stay away required depending on work schedule. Full training will be provided with an active hand's on approach via installing under supervision from lead installers or branch manager
No previous underfloor heating experience is necessary as full training will be provided via in house training from lead installers and branch manager.
The Installer will be carrying out the following work:
 - Installation of UFH systems on both domestic and commercial sites
 - Responsible for ensuring the works are delivered safely and to specification
 - Work to the highest possible standards
- Essential skills:
- Full Irish Driving license
 - Must be over 25 for insurance purpose
 - Living in or around Dublin
 - Able to work overtime as required
 - Must be able to stay away from home as required
 - Be able to work on own initiative within the installation teams
 - Excellent customer service skills
 - An excellent communicator with an ability to receive and deliver verbal instruction
- Preference:
- Well driven individual, with a willingness to learn and adapt into our hardworking team ethic
 - Provide basic disclosure certificate
 - Ideally hold a Safe Pass card or equivalent for construction site works
- Your contract will be for 40 hours per week, with typically 40-48 hours per week completed dependent on business needs.

We offer a competitive salary with overtime, company uniform, work-place pension / benefits, excellent career growth and development opportunities.

Job Type: Full-time (With 3 - 6 month probationary review)

Salary: Initial salary of € 24,000 per annum with the potential to rise up to € 28,000 dependent on performance reviews.

25 days annual holiday + bank holidays.

54.5 SHELL CASTING WORKER

IDENTIFICATION

- **ESCO code:** C7133
- **Description:** Coquille casting workers manufacture castings, including pipes, tubes, hollow profiles and other products of the first processing of steel, by operating hand-controlled equipment in a foundry. They conduct the flow of molten ferrous and non-ferrous metals into shells, taking care to create the exact right circumstances to obtain the highest quality metal. They observe the flow of metal to identify faults. In case of a fault, they notify the authorized personnel and participate in the removal of the fault.

RACE OFFER ANALYSIS

1. Welding intermediate
 - **General goals:** This course has been designed to provide industry with personnel who are certified in Carbon Steel Plate, Stainless Steel and Aluminum Welding. The aim of the course is to provide the trainees with the skills and related knowledge in Carbon Steel Plate, Stainless Steel and Aluminum Welding at a variety of positions and to develop their attitudes, person effectiveness and job seeking skills to enable them to obtain employment as Coded Welders.
 - **Modules**
 1. Title: manual metal arc welding intermediate; award: mma vertical open butt (en9606-1vob1); award body: approved in certifying body
 2. Title: tig welding stainless steel intermediate; award: tig sch10 stainless steel pipe (en9606-1ssp); award body: approved in certifying body
 3. Title: tig welding aluminium intermediate; award: (tig) aluminium weld (en9606-1al01); award body: approved in certifying body.
2. Skills to compete - welding intermediate
 - **General goals:** The purpose of this program is to enable the learners to acquire the knowledge, skills and competence to work in Carbon Steel Plate, Stainless Steel and Aluminum Welding at a variety of positions and to develop their attitudes, person effectiveness and job seeking skills to enable them to obtain employment as Welders. Employability Statement On successful completion of the program will enable applicant to source employment as Welders or progress on to Coded Pipe Welding.
 - **Modules**
 1. Title: machine tools (welding); award: no; award body: no

2. Title: theory of welding; award: no; award body: no
3. Title: in-company; award: no; award body: no
4. Title: safepass; award: no; award body: no
5. Title: induction; award: no; award body: no
6. Title: introduction to tig welding pipe; award: tig sch10 stainless steel pipe (en9606-1ssp); award body: approved in certifying body
7. Title: oxy-acetylene cutting; award: no; award body: no
8. Title: tig schedule 10 stainless steel pipe weld; award: tig sch10 stainless steel pipe (en9606-1ssp); award body: approved in certifying body
9. Title: mma vertical open butt weld; award: mma vertical open butt (en9606-1vob1); award body: approved in certifying body
10. Title: tig schedule 40 stainless steel pipe weld; award: tig sch40 stainless steel pipe (en9606-1ssp4); award body: approved in certifying body
11. Title: mig vertical open butt weld; award: mig vertical open butt (en9606-1vob0); award body: approved in certifying body
12. Title: tig aluminum weld; award: (tig) aluminum weld (en9606-1al01); award body: approved in certifying body.

54.6 DECONTAMINATION WORKER

IDENTIFICATION

- **ESCO code:** C7133
- **Description:**Decontamination workers remove and dispose of hazardous materials, such as radioactive materials or contaminated soil. They handle hazardous materials in compliance with safety regulations, investigate causes of contamination, and remove the contamination from the structure or site.

RACE OFFER ANALYSIS

- No current courses have been located

54.7 FOUNDRY MOULDER

IDENTIFICATION

- **ESCO code:** C7133
- **Description:**Foundry molders manufacture cores for metal molds, which are used to fill a space in the mold that must remain unfilled during casting. They use wood, plastic or other materials to create the core, selected to withstand the extreme environment of a metal mold.
 1. Maintain cores

RACE OFFER ANALYSIS

- No current courses have been located

54.8 MOLDMAKER

IDENTIFICATION

- **ESCO code:** C7133
- **Description:** Moldmakers manually create molds for the production of metal products. They mix sand and hardening materials to obtain a specialized mixture. They then use a pattern and one or more cores to produce the right shape impression in this material. The shaped material is then left to set, later to be used as a mold in the production of ferrous and non-ferrous metal castings.

RACE OFFER ANALYSIS

55. EARTHMOVING AND RELATED PLANT OPERATORS C8342

JOB OFFERS

- No job offers

55.1 BULLDOZER OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Bulldozer operators operate a heavy vehicle to move earth, rubble or other material over the ground.

RACE OFFER ANALYSIS

- No current courses have been located

55.2 DREDGE OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Dredge operators work with industrial equipment to remove underwater material in order to make the area accessible to ships, to establish ports, to lay cables or for other purposes, and move the material to the desired location.

RACE OFFER ANALYSIS

- No current courses have been located

55.3 EXCAVATOR OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Excavator operators use excavators to dig into earth or other materials to remove it. They are involved in a variety of projects, such as demolition, dredging, and the of digging holes, foundations and trenches.
 1. Supply machine with appropriate tools
 2. Dig soil mechanically
 3. Mechanical systems

RACE OFFER ANALYSIS

- No current courses have been located

55.4 GRADER OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Grader operators work with a heavy piece of mobile equipment that creates a flat surface by slicing off the top soil with a large blade. Graders usually provide a flat finish on the heavy earthmoving work performed by the scraper and bulldozer operators.

RACE OFFER ANALYSIS

- No current courses have been located

55.5 BATTERY DRIVING HAMMER OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Pile driving hammer operators work with a piece of heavy equipment that positions piles and hammers them into the ground using a rigging mechanism.

RACE OFFER ANALYSIS

- No current courses have been located

55.6 ROAD CONSTRUCTION WORKER

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Road construction workers perform road construction on earthworks, substructure works and the pavement section of the road. They cover the compacted soil with one or more layers. Road construction workers usually lay a stabilizing bed of sand or clay first before adding asphalt or concrete slabs in order to finish a road.

RACE OFFER ANALYSIS

- No current courses have been located

55.7 ROAD ROLLER OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Road roller operators work with equipment to compact a variety of materials, such as soil, gravel, concrete or asphalt, in the construction of roads and foundations. They walk behind, or sit on top of the road roller, depending on the type and size, and roll over the area to be compacted.

RACE OFFER ANALYSIS

- No current courses have been located

55.8 SCRAPER OPERATOR

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Scraper operators work with a mobile piece of heavy equipment that scrapes the top layer of the ground and deposits it in a hopper to be hauled off. They drive the scraper over the surface to be scraped, adapting the speed of the machine to the hardness of the surface.

RACE OFFER ANALYSIS

- No current courses have been located

55.9 SNOW-CLEARING WORKER

IDENTIFICATION

- **ESCO code:** C8342
- **Description:** Snow-clearing workers operate trucks and plows to remove snow and ice from public sidewalks, streets and other locations. They also dump salt and sand on the ground to de-ice the concerning locations.

RACE OFFER ANALYSIS

- No current courses have been located

55.10 SURFACE MINE PLANT OPERATOR

IDENTIFICATION

- **ESCO code:** C8342

- **Description:**Surface mine plant operators control heavy-duty equipment such as excavators and dump trucks, often involving a high level of spatial awareness, to excavate, load and transport ore, raw mineral including sand, stone and clay and overburden at quarries and surface mines.

RACE OFFER ANALYSIS

- No current courses have been located

VS

56. CRANE, HOIST AND RELATED PLANT OPERATORS C8343

JOB OFFERS

- No job offers

56.1 AUTOMATED CABLE VEHICLE CONTROLLER

IDENTIFICATION

- **ESCO code:** C8343
- **Description:**Automated cable vehicle controllers operate systems and control boards keeping under the control the operations of a varied array of modes of transport operated by cable. They can operate aerial cabins, telfers, funiculars, etc. They ensure continuous operations and intervene in the operations when unforeseen situations occur.

RACE OFFER ANALYSIS

- No current courses have been located

56.2 CONTAINER CRANE OPERATOR

IDENTIFICATION

- **ESCO code:** C8343
- **Description:**Container crane operators operate electrically powered cranes equipped with cantilevers on which hoisting gear is supported to load or unload container cargo. They move towers in position alongside vessel and lower cantilevers over the deck or hold of a vessel. They lift and move container along the cantilever and position the container on the dock, on the vessel deck or in the hold.

RACE OFFER ANALYSIS

- No current courses have been located

56.3 MOBILE CRANE OPERATOR

IDENTIFICATION

- **ESCO code:** C8343
- **Description:**Mobile crane operators work with a variety of crane types that can be moved easily around the road, rail and water. Mobile cranes are often mounted on trucks.

RACE OFFER ANALYSIS

- No current courses have been located

56.4 PRODUCTION PLANT CRANE OPERATOR

IDENTIFICATION

- **ESCO code:** C8343
- **Description:** Production plant crane operators operate the basic technologic cranes during the production process at the given unit by lifting and moving loads (bales, containers, buckets and other facilities) with raw and other materials.

RACE OFFER ANALYSIS

- No current courses have been located

56.5 TOWER CRANE OPERATOR

IDENTIFICATION

- **ESCO code:** C8343
- **Description:** Tower crane operators work with tower cranes, tall balance cranes consisting of a horizontal jib mounted on a vertical mast, along with the necessary motors and lifting hook attached to the jib. Operators control the crane from within a control cabin, or use radio control.

RACE OFFER ANALYSIS

- No current courses have been located

57. CONCLUSION

In base al crawl Big Data realized in the EURES job portal, companies are demanding professional profiles corresponding to the following ESCO occupations (in order of highest to lowest demand):

- Bricklayers and related workers C7112
- Carpenters and joiners C7115
- Building frame and related trades workers not elsewhere classified C7119
- Floor layers and tile setters C7122
- Plasterers C7123
- Insulation Workers C7124
- Plumbers and pipe fitters C7126
- Air conditioning and refrigeration mechanics C7127
- Painters and related workers C7131
- Spray painters and varnishers C7132

The training needs, conceived from the perspective set forth in the Introduction to this report, must be consistent with the skills necessary to exercise the profession with solvency and which have been defined in the "Identification" section of each occupation.

Among the previous occupations, it is noteworthy, at the moment to extract the information, the non-existence of formative offer related to occupations of high demand, such as:

- 7119 Construction and allied trades workers, not elsewhere classified. Courses that should be promoted:
 - o Basic work in tubular scaffolding assembly.
 - o Scaffolding erection.
 - o Organization and supervision of scaffolding assembly.
 - o Vertical works.
 - o Confined spaces
 - o Safety at height.
 - o Anchorage installation.
 - o Demolition and rehabilitation workers.
- 7127 Air conditioning and refrigeration mechanics. Courses that should be promoted:
 - o Installation of air conditioning and air conditioning equipment.
 - o Maintenance of air conditioning systems.
 - o Thermal installer of buildings.
 - o Development of air conditioning installation projects.
 - o Energy efficiency in buildings.
- 7114 Concrete setters, concrete finishers and the like. Courses that should be promoted:
 - o Operations prior to concreting
 - o Concrete transfer and pouring.

- Compacting and curing of concrete.
- Pastes, mortars, adhesives and concretes.
- Construction of foundations and sanitation.
- Vertical formwork construction.
- Horizontal formwork erection.
- Pre-assembly of non-modular formwork panels.
- Pre-assembly and erection of climbing formwork.
- Organization of formwork and concrete formwork erection works.
- Moulds specialist: formwork worker.

On the other hand, there is a training offer for occupations that are in low demand, such as:

- 7121 Roofers
- 7122 Floor and tile fixers
- 7132 Painters and varnishers
- 7133 Building structure cleaners

60.1 STONE ENGRAVER

IDENTIFIER

- **ESCO code:** C7112
- **Description:** Stone engravers use tools, machines and chemicals to engrave or carve designs or inscriptions on stone surfaces.

ANALYSIS OF THE COURSE OFFER

1. Cap plasterer-plasterer
 - **General objectives:**The holder of this diploma is a professional construction worker. He works in a company specializing in fitting out and finishing. Its activity takes place mainly inside buildings and relates to the production of linings, partitions, ceilings and floors, and decorative works. During his training, he acquired a double competence relating to the implementation of wet products (bricks, brick tiles, plaster tiles and plaster laid in the traditional way) and dry products (plates and associated materials involving assembly diversified with multiple functions: acoustic, thermal, security).
 - **Modules**
 1. Cap plasterer-plasterer
2. Cap mason
 - **General objectives:**The holder of this diploma carries out masonry activities in a building company, and mainly in the field of structural work.He produces structural elements from concrete blocks, bricks, joists joined by binding materials (cement). For reinforced concrete structures, it produces wooden formwork, reinforcement frames, mixes manually or mechanically, and rolls the concrete. It also performs various coatings, more particularly with cement mortar. He masters the handling of hand tools (trowel, plumb line, hammer, spirit level, square) and mechanical tools (concrete mixer, elevator, electric or pneumatic vibrator).
 - **Modules**
 1. Cap mason
3. Cap jobs in plaster and insulation
 - **General objectives:**Demonstrated skills: - Study and prepare an intervention (decode a technical file, choose materials and tools). - Carry out and control a current structure (secure an intervention, deposit, build partitions, linings, insulation, treat joints, fold up the site). - Carry out specific work (set up and use scaffolding, build a structure in bricks or plaster tiles, make plaster coatings).
 - **Modules**
 1. Cap jobs in plaster and insulation
4. Professional worker in eco-construction
 - **General objectives:**1 / Preparation and organization of the site - Read an execution plan, draw a freehand drawing and explain the installation instructions according to the rules of bioclimaticism. - Choose and maintain the appropriate tools (use measuring, leveling and plumbing tools; sharpen tools and change consumables). - Work as a team and in consultation with other trades, identify tasks by situating them in relation to other interventions and check the elements being carried out. - Respect the safety rules and react to an accident situation or a dangerous work situation. - Explain the environmental qualities of ecomaterials and check the possibilities of using the site's bio or geomaterial resources. -. Achieve points of stowage, dismantle, clean, store, sort and remove waste. 2 / Realization and renovation of masonry works based on biobased and geosourced materials - Position the foundation reinforcement (conventional reinforcement or eco-construction alternatives). - Create barriers against rising by capillary action, install a compliant peripheral drain and perform ventilated bristling taking into account the passage of fluids and networks. - Put in place an insulation according to the defined inertia (implant and fix the guides; prepare, pour and erect a slab; prepare the lime or earth mortar; cut and cut organic or geosourced materials (adobe, stone) with the appropriate tools; assemble the elements ensuring the connections and respecting the equipment, plumbs, alignment and rough dimensions; perform jointing or jointing; make or set up suitable forms and make reservations; carry out the dosages and prepare the volumes necessary to fill the formwork while respecting the rules specific to the materials; stripping). 3 / Realization of the structure of a wood frame from local sectors and respectful of the environment and health - Describe the different wood construction techniques. - Cut, mark and assemble the different parts of the wooden frame structure, making sure that the dimensions and squareness, plumbs and alignments are respected

(prepare and fix the implant base, recovering if necessary the gaps with The foundations ; bracing from the panels allowing moisture transfer; create barriers against rising humidity by capillary action; make the connections between components; prepare and fix the chaining elements). - Cut, install and fix the joists, the hoppers, the floor and the structural elements of the roof. - Put in place the under-roof screen. 4 / Realization or resumption of airtight and water-tight insulation with bio or geo-sourced materials respectful of the environment and health - Prepare the support and reservations. - Put in place the chosen insulation using the appropriate technique (dry and wet sector) or lay the straw bales in accordance with professional rules (take a survey and carry out the layout, resize the boot according to the situations). - Apply renderings (especially on a raw earth support), facings, cladding. - Ensure the airtightness of the wall and the migration of water vapor (install a vapor barrier / rain screen; Seal the openings and manage the singular points; adapt the external elements to the new envelope). - Prepare the site for the infiltrometry test and apply the corrective measures.

- **Modules**
 1. Professional worker in eco-construction
- 5. Sustainable construction team leader
 - **General objectives:**The proven skills of the Sustainable Construction Team Leader are first of all to analyze the thermal / hygrometric characteristics of the building according to the characteristics of the constituent materials, plans and the building environment. It will analyze these parameters taking into account the regulatory texts and will propose a diagnosis and proposals for thermal objectives of the building (under renovation or new). Depending on these energy objectives, it will propose high-performance technical solutions enabling them to be achieved while ensuring compliance with safety and by planning adequate human and technical resources in a given time. During the work, he will ensure that this plan is respected and will propose corrective measures if necessary. During the site he will implement building envelope techniques (insulation, airtightness, spaces for the passage of ducts) with the workers he supervises and will supervise the implementation of the shell (masonry, wood and joinery integration) while respecting building standards and rules. Finally, the last skills attested will be the ability to produce a summary report upstream and downstream of the operation and for this to use the various means of information and communication made available to them.
 - **Modules**
 1. Sustainable construction team leader

60.2 MASON / MASON

IDENTIFIER

- **ESCO code:** C7112
- **Description:** Masons build walls and structures by laying bricks according to a set pattern, using a binder such as cement to secure the bricks. They then fill the joints with mortar or other suitable materials.

ANALYSIS OF THE COURSE OFFER

1. Cap plasterer-plasterer
 - **General objectives:**The holder of this diploma is a professional construction worker. He works in a company specializing in fitting out and finishing. Its activity takes place mainly inside buildings and relates to the production of linings, partitions, ceilings and floors, and decorative works. During his training, he acquired a double competence relating to the implementation of wet products (bricks, brick tiles, plaster tiles and plaster laid in the

traditional way) and dry products (plates and associated materials involving assembly diversified with multiple functions: acoustic, thermal, security).

- **Modules**
 1. Cap plasterer-plasterer
- 2. Cap mason
 - **General objectives:**The holder of this diploma carries out masonry activities in a building company, and mainly in the field of structural work.He produces structural elements from concrete blocks, bricks, joists joined by binding materials (cement). For reinforced concrete structures, it produces wooden formwork, reinforcement frames, mixes manually or mechanically, and rolls the concrete. It also performs various coatings, more particularly with cement mortar. He masters the handling of hand tools (trowel, plumb line, hammer, spirit level, square) and mechanical tools (concrete mixer, elevator, electric or pneumatic vibrator).
 - **Modules**
 1. Cap mason
- 3. Cap jobs in plaster and insulation
 - **General objectives:**Demonstrated skills: - Study and prepare an intervention (decode a technical file, choose materials and tools). - Carry out and control a current structure (secure an intervention, deposit, build partitions, linings, insulation, treat joints, fold up the site). - Carry out specific work (set up and use scaffolding, build a structure in bricks or plaster tiles, make plaster coatings).
 - **Modules**
 1. Cap jobs in plaster and insulation
- 4. Professional worker in eco-construction
 - **General objectives:**1 / Preparation and organization of the site - Read an execution plan, draw a freehand drawing and explain the installation instructions according to the rules of bioclimaticism. - Choose and maintain the appropriate tools (use measuring, leveling and plumbing tools; sharpen tools and change consumables). - Work as a team and in consultation with other trades, identify tasks by situating them in relation to other interventions and check the elements being carried out. - Respect the safety rules and react to an accident situation or a dangerous work situation. - Explain the environmental qualities of ecomaterials and check the possibilities of using the site's bio or geomaterial resources. -. Achieve points of stowage, dismantle, clean, store, sort and remove waste. 2 / Realization and renovation of masonry works based on biobased and geosourced materials - Position the foundation reinforcement (conventional reinforcement or eco-construction alternatives). - Create barriers against rising by capillary action, install a compliant peripheral drain and perform ventilated bristling taking into account the passage of fluids and networks. - Put in place an insulation according to the defined inertia (implant and fix the guides; prepare, pour and erect a slab; prepare the lime or earth mortar; cut and cut organic or geosourced materials (adobe, stone) with the appropriate tools; assemble the elements ensuring the connections and respecting the equipment, plumbs, alignment and rough dimensions; perform jointing or jointing; make or set up suitable forms and make reservations; carry out the dosages and prepare the volumes necessary to fill the formwork while respecting the rules specific to the materials; stripping). 3 / Realization of the structure of a wood frame from local sectors and respectful of the environment and health - Describe the different wood construction techniques. - Cut, mark and assemble the different parts of the wooden frame structure, making sure that the dimensions and squareness, plumbs and alignments are respected (prepare and fix the implant base, recovering if necessary the gaps with The foundations ; bracing from the panels allowing moisture transfer; create barriers against rising humidity by capillary action; make the connections between components; prepare and fix the chaining elements). - Cut, install and fix the joists, the hoppers, the floor and the structural elements of the roof. - Put in place the under-roof screen. 4 / Realization or resumption of airtight and water-tight insulation with bio or geo-sourced materials

respectful of the environment and health - Prepare the support and reservations. - Put in place the chosen insulation using the appropriate technique (dry and wet sector) or lay the straw bales in accordance with professional rules (take a survey and carry out the layout, resize the boot according to the situations). - Apply renderings (especially on a raw earth support), facings, cladding. - Ensure the airtightness of the wall and the migration of water vapor (install a vapor barrier / rain screen; Seal the openings and manage the singular points; adapt the external elements to the new envelope). - Prepare the site for the infiltrometry test and apply the corrective measures.

67.1 INSULATION FITTER

IDENTIFIER

- **ESCO code:** C7124
- **Description:** Insulation fitters install different insulation materials to protect a structure or components from heat, cold or noise from the environment.

ANALYSIS OF THE COURSE OFFER

1. Cap fitter in thermal and acoustic insulation
 - **General objectives:**The holder of this diploma provides thermal and acoustic insulation of industrial type installations: refineries, thermal power stations, boiler rooms, cold stores. He can also work in the building sector. The fitter carries out the activities of site preparation, production of protective and insulation coatings. In preparation for the site, he reads plans and diagrams, chooses tools, assembles scaffolding He performs thermal insulation of pipes, walls and devices: traces, cuts and shapes insulating elements that he assembles and fixes on different supports (frames, frames). For sound insulation, he sets up panels, slabs and plates. It produces protective coatings: laying sheet materials (metals, plastics), application of coatings (cement, resin). He carries out the maintenance and upkeep of the equipment used.
 - **Modules**
 1. Cap fitter in thermal and acoustic insulation
2. building waterproofer
 - **General objectives:**The waterproofer-bardeur: - prepares and installs the site by setting up the material, the equipment, in particular of safety, he receives the materials and stores them, he sets up the means of access ,. - implements the activities relating to supports and load-bearing elements (installation, cutouts), thermal insulation (preparation, application, realization, installation), bituminous waterproofing coatings (execution of preparatory works, realization of waterproofing coatings 'waterproofing under heavy protection, production of self-protected waterproofing coatings), the treatment of singular points (welding of waterproofing statements, insertion of water evaluations and roof penetrations in the coating), protection of the coverings of waterproofing (realization of protections), common cladding (installation of cladding trays, installation of an exterior skin, insertion and fixing of parts and fittings) ,. - carries out maintenance work (recognition and repair of waterproofing disorders) and site folding (cleaning the site, waste management, equipment control, site folding). - prepares the supports and carries out coatings of waterproofing to keep structures and buildings "out of water". It operates on all walls particularly exposed to water or humidity: roof terraces, balconies, car parks, reservoirs, terraces, buried walls , bridge and tunnel decks.After checking the supports, he can, depending on the case, carry out various tasks: implementation of thermal insulation, waterproofing and their possible protection and treatment of singular points such as rainwater drains and expansion joints - It installs and fixes, depending on the surfaces to be sealed, the most suitable insulating materials: mineral wool, plastic foam, cellular glass with glue, bitumen or mechanical fixings. It uses waterproofing coatings including: bitumen-based sheets or plastic and elastomer sheets. It uses different steel or composite facings in facade cladding. - He lays and fixes the coverings (facings, thermal insulating plates, canvas, ...), profiles, reinforcements, edges of tables, angles, ... - He makes a single skin and double skin cladding, in steel , in composite panels or in wood
 - **Modules**
 1. building waterproofer
3. Bp waterproofing of buildings and public works
 - **General objectives:**These professions are based on a technical and legal framework which evolves regularly according to new regulations and standards (design, safety, operation, etc. The holder of this BP specialty works in companies specializing in the implementation waterproofing complexes in the building and public works sectors on new or renovation sites. The energy transition requires taking into account the parameters linked to sustainable development. The evolution of digital tools and applications requires the integration of innovative practices in line with the professional needs expressed. His skills are exercised in optimal conditions of safety and health protection, in outdoor environments,interior and which require special precautions related to work at height.

- **Modules**
 1. Bp waterproofing of buildings and public works
- 4. Coordinator in biobased energy renovation
 - **General objectives:** He is able to: - Identify the client's expectations and collect data. - Carry out freehand plans of the existing and carry out the quantity survey - Locate and analyze the specificities of the building with respect to its environment. - Describe the characteristics, disorders, pathologies of the enclosure and the characteristics of its equipment. - Carry out the thermal and energy study of the housing. - Write the overall energy balance of the building for the client. - Explain and explain for the client the priorities and targeted improvement objectives - Propose improvement solutions aimed at reducing exposure and health risks or propose solutions for correcting or isolating noise from impacts or aerial - Produce different scenarios of thermal insulation to achieve average, high and superior performance with a progressively high budget - Recommend a summer comfort improvement system to avoid the need for air conditioning. - Propose thermal corrections to solve cold wall problems or preserve the inertia properties of the walls. - Propose air renewal, heating and water production devices complementary to the thermal improvement project - Address the overall cost of the work and the financial and tax assistance from which the MO can benefit. - Describes practical details and technical points in anticipation of their proper execution. - Carries out the implementation of different insulation techniques. - Ensures the implementation of thermal corrective and finishing plasters. - Ensures the manufacture and assembly of inertia walls. - Chooses the techniques and methods of implementing exterior cladding in an environmental approach. - Locates airtightness defects and sensitive points created by the intervention. - Prepare technical documents for stakeholders. - Establish a chronological order of work according to previous proposals and transcribe them on a schedule. - Proceed and participate in the self-control and traceability systems of good professional practices to meet a performance guarantee. - Chooses the techniques and methods of implementing exterior cladding in an environmental approach. - Locates airtightness defects and sensitive points created by the intervention. - Prepare technical documents for stakeholders. - Establish a chronological order of work according to previous proposals and transcribe them on a schedule. - Proceed and participate in the self-control and traceability systems of good professional practices to meet a performance guarantee. - Chooses the techniques and methods of implementing exterior cladding in an environmental approach. - Locates airtightness defects and sensitive points created by the intervention. - Prepare technical documents for stakeholders. - Establish a chronological order of work according to previous proposals and transcribe them on a schedule. - Proceed and participate in the self-control and traceability systems of good professional practices to meet a performance guarantee.
 - **Modules**
 1. Coordinator in biobased energy renovation
- 5. Professional worker in eco-construction
 - **General objectives:** 1 / Preparation and organization of the site - Read an execution plan, draw a freehand drawing and explain the installation instructions according to the rules of bioclimaticism. - Choose and maintain the appropriate tools (use measuring, leveling and plumbing tools; sharpen tools and change consumables). - Work as a team and in consultation with other trades, identify tasks by situating them in relation to other interventions and check the elements being carried out. - Respect the safety rules and react to an accident situation or a dangerous work situation. - Explain the environmental qualities of ecomaterials and check the possibilities of using the site's bio or geomaterial resources. -. Achieve points of stowage, dismantle, clean, store, sort and remove waste. 2 / Realization and renovation of masonry works based on biobased and geosourced materials - Position the foundation reinforcement (conventional reinforcement or eco-construction alternatives). - Create barriers against rising by capillary action, install a compliant peripheral drain and perform ventilated bristling taking into account the

passage of fluids and networks. - Put in place an insulation according to the defined inertia (implant and fix the guides; prepare, pour and erect a slab; prepare the lime or earth mortar; cut and cut organic or geosourced materials (adobe, stone) with the appropriate tools; assemble the elements ensuring the connections and respecting the equipment, plumbs, alignment and rough dimensions; perform jointing or jointing; make or set up suitable forms and make reservations; carry out the dosages and prepare the volumes necessary to fill the formwork while respecting the rules specific to the materials; stripping). 3 / Realization of the structure of a wood frame from local sectors and respectful of the environment and health - Describe the different wood construction techniques. - Cut, mark and assemble the different parts of the wooden frame structure, making sure that the dimensions and squareness, plumbs and alignments are respected (prepare and fix the implant base, recovering if necessary the gaps with The foundations ; bracing from the panels allowing moisture transfer; create barriers against rising humidity by capillary action; make the connections between components; prepare and fix the chaining elements). - Cut, install and fix the joists, the hoppers, the floor and the structural elements of the roof. - Put in place the under-roof screen. 4 / Realization or resumption of airtight and water-tight insulation with bio or geo-sourced materials respectful of the environment and health - Prepare the support and reservations. - Put in place the chosen insulation using the appropriate technique (dry and wet sector) or lay the straw bales in accordance with professional rules (take a survey and carry out the layout, resize the boot according to the situations). - Apply renderings (especially on a raw earth support), facings, cladding. - Ensure the airtightness of the wall and the migration of water vapor (install a vapor barrier / rain screen; Seal the openings and manage the singular points; adapt the external elements to the new envelope). - Prepare the site for the infiltrometry test and apply the corrective measures.

69.1 BATHROOM PLANNER

IDENTIFIER

- **ESCO code:** C7126
- **Description:** Bathroom designers install bathroom elements. They take the necessary measurements, prepare the room and remove old parts if necessary, and install new parts, including connection to the water supply network, town gas, sewerage and the electricity network.

ANALYSIS OF THE COURSE OFFER

1. Cold beep and air conditioning
 - **General objectives:** The main installation activities consist of: • identifying the working materials and equipment on the site, • installing and installing the equipment, assembling and connecting the elements of the fluidic and electrical installations, • carrying out the presettings of the installations, • setting all or part of the equipment in service, • report on the tasks carried out, • perform simple maintenance tasks on the installations.
 - **Modules**
 1. Cold beep and air conditioning
2. Bep installation of energy and climate systems
 - **General objectives:** null
 - **Modules**
 1. Bep installation of energy and climate systems
3. House painter (btm)
 - **General objectives:** - Advise and develop a work proposal to clients in terms of embellishment, surface finishes, installation of wall coverings, flooring, ... - Organize his interventions and those of a team and ensure costs and deadlines . - Carry out painting work (surface preparation, embellishment). - Participate in the management of the painting business. - Supervise and lead the teams.
 - **Modules**
 1. House painter (btm)
4. Bp fitter in climatic and sanitary engineering installations
 - **General objectives:** He carries out the adjustments, the necessary tests and the commissioning of the installation. He carries out the diagnosis and the corrective maintenance of all or part of a climatic and sanitary system. It provides information on the commissioning and intervention documents for the installations. He communicates with customers and users, company staff, manufacturers, suppliers and control bodies. Finally, he explains to the user the operation of all or part of a system and informs them of maintenance obligations.
 - **Modules**
 1. Bp fitter in climatic and sanitary engineering installations

5. Professional title maintenance agent of climatic comfort equipment
 - **General objectives:** It intervenes in compliance with contracts, regulations and sustainable development. It ensures the necessary controls in terms of safety, the quality of discharges into the environment, and the performance of devices in terms of energy consumption. generally alone in the user with whom he is in direct contact. It is autonomous while being placed under the direct control of a manager to whom it transmits any information relating to its activity. He can work in a team during interventions requiring the presence of several maintenance agents. He is required to carry out interventions in a context of risks: related to the presence of gas and combustion products, to the handling of energized electrical equipment, to frequent trips by car, awkward working positions and handling loads in congested spaces. These interventions require sustained attention. For some of these interventions, he must have an electrical authorization. He carries out his activity in compliance with the safety and health prevention instructions, the PPSPS if there is one, or otherwise the prevention plan. The practice of the profession involves irregular hours linked to emergencies and on-call duty. He provides the client, in his capacity as representative of his company, with any explanation concerning his interventions. He carries out interventions on equipment characterized by strong technological developments and a wide diversity which oblige him to undergo continuous training. He often faces unforeseen situations.
 - **Modules**
 1. Professional title maintenance agent of climatic comfort equipment

69.2 WATER NETWORK AGENT

IDENTIFIER

- **ESCO code:** C7126
- **Description:** Water network agents maintain pipes and pumping stations used for water supply and sewage disposal. They perform scheduled maintenance and repair tasks and remove plugs from pipes and drains.

ANALYSIS OF THE COURSE OFFER

1. Cold beep and air conditioning

He is required to carry out interventions in a context of risks: related to the presence of gas and combustion products, to the handling of energized electrical equipment, to frequent trips by car, awkward working positions and handling loads in congested spaces. These interventions require sustained attention. For some of these interventions, he must have an electrical authorization. He carries out his activity in compliance with the safety and health prevention instructions, the PPSPS if there is one, or otherwise the prevention plan. The practice of the profession involves irregular hours linked to emergencies and on-call duty. He provides the client, in his capacity as representative of his company, with any explanation concerning his interventions. He carries out interventions on equipment characterized by strong technological developments and a wide diversity which oblige him to undergo continuous training. He often faces unforeseen situations.

 - **General objectives:**1 / Preparation and organization of the site - Read an execution plan, draw a freehand drawing and explain the installation instructions according to the rules of bioclimaticism. - Choose and maintain the appropriate tools (use measuring, leveling and plumbing tools; sharpen tools and change consumables). - Work as a team and in consultation with other trades, identify tasks by situating them in relation to other interventions and check the elements being carried out. - Respect the safety rules and react to an accident situation or a dangerous work situation. - Explain the environmental qualities of ecomaterials and check the possibilities of using the site's bio or geomaterial resources. -. Achieve points of stowage, dismantle, clean, store, sort and remove waste. 2 / Realization and renovation of masonry works based on biobased and geosourced materials - Position the foundation reinforcement (conventional reinforcement or eco-construction alternatives). - Create barriers against rising by capillary action, install a

compliant peripheral drain and perform ventilated bristling taking into account the passage of fluids and networks. - Put in place an insulation according to the defined inertia (implant and fix the guides; prepare, pour and erect a slab; prepare the lime or earth mortar; cut and cut organic or geosourced materials (adobe, stone) with the appropriate tools; assemble the elements ensuring the connections and respecting the equipment, plumbs, alignment and rough dimensions; perform jointing or jointing; make or set up suitable forms and make reservations; carry out the dosages and prepare the volumes necessary to fill the formwork while respecting the rules specific to the materials; stripping). 3 / Realization of the structure of a wood frame from local sectors and respectful of the environment and health - Describe the different wood construction techniques. - Cut, mark and assemble the different parts of the wooden frame structure, making sure that the dimensions and squareness, plumbs and alignments are respected (prepare and fix the implant base, recovering if necessary the gaps with The foundations ; bracing from the panels allowing moisture transfer; create barriers against rising humidity by capillary action; make the connections between components; prepare and fix the chaining elements). - Cut, install and fix the joists, the hoppers, the floor and the structural elements of the roof. - Put in place the under-roof screen. 4 / Realization or resumption of airtight and water-tight insulation with bio or geo-sourced materials respectful of the environment and health - Prepare the support and reservations. - Put in place the chosen insulation using the appropriate technique (dry and wet sector) or lay the straw bales in accordance with professional rules (take a survey and carry out the layout, resize the boot according to the situations). - Apply renderings (especially on a raw earth support), facings, cladding. - Ensure the airtightness of the wall and the migration of water vapor (install a vapor barrier / rain screen; Seal the openings and manage the singular points; adapt the external elements to the new envelope). - Prepare the site for the infiltrometry test and apply the corrective measures.

- **Modules**
 1. Professional worker in eco-construction

73.6 FOUNDRY MOULDER / FOUNDRY MOULDER

IDENTIFIER

- **ESCO code:** C7133
- **Description:** Foundry molders make cores used in foundry molds, which are used to fill the spaces that must remain hollow in the casting. They use wood, plastic or other materials to create the core, which must withstand extreme temperatures during casting.

ANALYSIS OF THE COURSE OFFER

1. Professional worker in eco-construction
 - **General objectives:** 1 / Preparation and organization of the site - Read an execution plan, draw a freehand drawing and explain the installation instructions according to the rules of bioclimaticism. - Choose and maintain the appropriate tools (use measuring, leveling and plumbing tools; sharpen tools and change consumables). - Work as a team and in consultation with other trades, identify tasks by situating them in relation to other interventions and check the elements being carried out. - Respect the safety rules and react to an accident situation or a dangerous work situation. - Explain the environmental qualities of ecomaterials and check the possibilities of using the site's bio or geomaterial resources. -. Achieve points of stowage, dismantle, clean, store, sort and remove waste. 2 / Realization and renovation of masonry works based on biobased and geosourced materials - Position the foundation reinforcement (conventional reinforcement or eco-

construction alternatives). - Create barriers against rising by capillary action, install a compliant peripheral drain and perform ventilated bristling taking into account the passage of fluids and networks. - Put in place an insulation according to the defined inertia (implant and fix the guides; prepare, pour and erect a slab; prepare the lime or earth mortar; cut and cut organic or geosourced materials (adobe, stone) with the appropriate tools; assemble the elements ensuring the connections and respecting the equipment, plumbs, alignment and rough dimensions; perform jointing or jointing; make or set up suitable forms and make reservations; carry out the dosages and prepare the volumes necessary to fill the formwork while respecting the rules specific to the materials; stripping). 3 / Realization of the structure of a wood frame from local sectors and respectful of the environment and health - Describe the different wood construction techniques. - Cut, mark and assemble the different parts of the wooden frame structure, making sure that the dimensions and squareness, plumbs and alignments are respected (prepare and fix the implant base, recovering if necessary the gaps with The foundations ; bracing from the panels allowing moisture transfer; create barriers against rising humidity by capillary action; make the connections between components; prepare and fix the chaining elements). - Cut, install and fix the joists, the hoppers, the floor and the structural elements of the roof. - Put in place the under-roof screen. 4 / Realization or resumption of airtight and water-tight insulation with bio or geo-sourced materials respectful of the environment and health - Prepare the support and reservations. - Put in place the chosen insulation using the appropriate technique (dry and wet sector) or lay the straw bales in accordance with professional rules (take a survey and carry out the layout, resize the boot according to the situations). - Apply renderings (especially on a raw earth support), facings, cladding. - Ensure the airtightness of the wall and the migration of water vapor (install a vapor barrier / rain screen; Seal the openings and manage the singular points; adapt the external elements to the new envelope). - Prepare the site for the infiltrometry test and apply the corrective measures.

73.7 CORE MOULDER / CORE MOULDER

IDENTIFIER

- **ESCO code:** C7133
- **Description:** Core moulders create molds by hand for fabricating metal products. They mix sand and hardening materials to obtain a specialized mixture. They then use a pattern and one or more cores to produce the desired shape in the material. The formed material then has to harden and is then used as a mold for casting ferrous or non-ferrous metals.

 - **Modules**
 1. Professional title operator of hydraulic excavator and backhoe loader

75. OPERATORS OF CRANES, VARIOUS LIFTING EQUIPMENT AND SIMILAR EQUIPMENT C8343

JOB OFFERS

- No job offer

75.1 GUIDED ROPE TRANSPORT OPERATOR / OPERATOR, GUIDED ROPE TRANSPORT

IDENTIFIER

- **ESCO code:** C8343
- **Description:** Rope Guided Transport Operators operate control systems and panels, while maintaining control of the operations of various modes of Ripple Guided Transport. They can operate gondolas, cable cars, funiculars, etc. They ensure continuous operations and intervene in operations in the event of unforeseen situations.

ANALYSIS OF THE COURSE OFFER

1. Professional title tower crane operator
 - **General objectives:** The tower crane operator works closely with the teams implementing the formwork, reinforcement and concrete. He is also required to handle various prefabricated parts during the delivery and installation operations. He drives the tower crane, either from the crane cab or from the ground or from the work area using a control panel. To carry out his activities, the crane operator respects the safety rules concerning the crane and its immediate environment. Depending on the importance of the sites, he works under the orders and under the control of a team leader or a site foreman. Each activity is carried out in different contexts depending on the tasks to be performed, the geographical location of the site and the weather conditions. The crane operator intervenes as soon as the crane is assembled and carries out all handling operations until the dismantling and folding of the machine. He is responsible for stopping the operation of the crane in the event of dangerous wind. He refuses a maneuver if it presents risks to him or to third parties. In the work system, he may have to anticipate the orders of his superiors to improve the performance of the team. He holds the job in compliance with individual and collective safety rules and, if there are, in application, the specific health and safety protection plan (PPSPS), otherwise the prevention plan. He has an authorization issued by his employer to operate load lifting equipment:
 - **Modules**
 1. Professional title tower crane operator

75.2 MOBILE CRANE OPERATOR

IDENTIFIER

- **ESCO code:** C8343
- **Description:** Mobile crane operators work with various types of cranes that can be easily moved around roads, railways and waterways. Mobile cranes are often mounted on trucks.

76. CONCLUSION

Based on the Big Data crawl carried out on the EURES job portal, companies are demanding 3 professional profiles, which constitute more than 60% of the demands, corresponding to the following ESCO occupations (in order of highest to lowest demand):

- Plumbers and pipe fitters C7126
- Carpenters and joiners C7115
- Bricklayers and related workers C7112

Accordingly, training related to the following courses should be promoted:

- Plumbers and Pipefitters C7126.

- Water supply and distribution and sewerage networks and installations
- Development of works of water supply and distribution and sanitation networks and installations
- Water and sewerage network commissioning systems
- Organization of the maintenance of water distribution and sanitation networks.
- Plumber installer.
- Technician in heating installations.
- Industrial piping technician.

- Carpenters and Joiners C7115

- Assembly of furniture and elements of carpentry
- Furniture installation projects
- Furniture installations
- Application of surface finishing products in carpentry and furniture.
- Adjustment and finishing of furniture installations
- Measurements for the installation of furniture elements
- Assembly and installation of doors and windows
- Installation of furniture structures

- Bricklayers and related workers C7112

- Pastes, mortars, adhesives and concretes
- Masonry works for cladding
- Process and preparation of equipment and means in masonry - masonry work.
- Execution of masonry for cladding.
- Execution of facing masonry works
- Execution of facing masonry
- Execution of masonry walls

At a lower level, but with a notable demand, are the following professional profiles (in order of greater or lesser demand):

- Air conditioning and refrigeration mechanics C7127
- Roofers C7121
- Painters and related workers C7131
- Concrete placers, concrete finishers, and related workers C7114
- Floor layers and tile setters C7122
- Insulation Workers C7124
- Building structure cleaners C7133
- Plasterers C7123

Finally, with an almost null or non-existent demand are the following professional profiles:

- House builders C7111
- Building frame and related trades workers not elsewhere classified C7119
- Glaziers C7125
- Spray painters and varnishers C7132
- Earthmoving and related plant operators C8342
- Crane, hoist, and related plant operators C8343

The training needs in those occupations in high demand, conceived from the perspective set out in the Introduction to this report, must be coherent with the description of what is required to exercise the profession with solvency, and which have been defined in the "Identification" section of each occupation.

Analyzing the number of training offers related to each occupation shows a high correlation between occupations with demand and training offers to train workers in these occupations.

Only two situations are detected where the training offer is present and the demand from companies is almost null:

- Operators of earthmoving and similar equipment C8342
- Operators of cranes, hoists, and similar equipment C8343
- Skilled building and related trades not elsewhere classified C7119
